

# WATER BASED DEGREASER

## Description

WATER BASED DEGREASER is an environmentally friendly, general-purpose de-greasing fluid suitable for cleaning grease and oil deposits in most industrial and automotive applications. Being water-based the degreaser has no flash point and is therefore extremely safe to use, particularly in poorly ventilated areas, or areas that pose a fire risk, where the traditional solvent-based degreasers could prove dangerous. It is bio-degradable, of medium alkalinity and has anti-static properties.

## Applications

WATER BASED DEGREASER is used for degreasing painted and unpainted surfaces of mechanical and automotive components soiled with dirty oil and grease as well as in the industrial food industry cleaning. It can also be used for domestic use in and around the house, floors, walls, tiles etc. Apply neat with a brush or spray and allow soaking into grime or agitating and then washing off with water. The length of soaking time depends on the depth to be penetrated. It can also be used in high pressure cleaners.

## Features/Benefits

- Fast cleaning
- Safe on metals
- Economical
- Free rinsing
- Non-flammable
- Bio-degradable

## TECHNICAL DATA

TEST	TYPICAL RESULTS
Colour	Transparent
Ingredients	Synthetic detergents and phosphates
Flash Point	Non-Flammable
Specific Gravity	1.05
Odour	Neutral
Ph	12
Boiling Point °C min.	100
