

SOLVENT BASED DEGREASER

Description

Solvent based degreaser is a controlled-drying, solvent based, water-washable degreasing fluid designed for industrial and automotive applications. It is a quick remover of grease and oils or any petroleum based product spillage on garage, workshop and engine room floor surfaces. It is also an excellent external engine cleaner.

Applications

Apply by brush or sponge. Hose down or brush with water

Features/Benefits

- Powerful solvent action
- Minimum evaporation loss
- Easily removed with water
- Simple spray or brush action
- Can be used with hard, soft or seawater

Care and Handling

All packages should be stored under cover. Where outside storage is unavoidable drums should be laid horizontally to avoid the possible ingress of water and the obliteration of drum markings. Products should not be stored above 60°C, exposed to hot sun or freezing conditions

Health and Safety

Storage :
Designation area with good ventilation

Use:

Ventilation away from source of ignition or flame

Protective Clothing:

Gloves & goggles to be worn, along with air fed mask when spraying.

TECHNICAL DATA

TEST	TYPICAL RESULTS
NLGI Number	00
Base	Lithium
Viscosity @ 40°C, cSt	150
Drop Point °C	150
Operating Temperature °C	10 to 120
