LUBRICATION

# CB150 CUTTERBAR OIL

## Description

CB150 Cutterbar Oil is specially formulated for the lubrication of chainsaw, sawmill and mechanical harvester cutter bars, and wet environment general purpose and slideway lubrication. These lubricants are blended using superior quality virgin base oils and carefully selected premium quality additives and tackifiers. Maximum surface film strength is achieved with optimal oil flow characteristics and minimal oil throw. Metal to metal wear is further reduced with a small percentage of polymers and extreme pressure additives.

## Applications

- Superior base oils provide ideal viscosity ensuring good flow characteristics
- Increased treat rates of a high quality Tackifier prevents oil being thrown off and reduces overall usage
- Extreme pressure and polymer additives minimize wear to the cutterbar chain, and sprocket
- Excellent film strength ensures ideal lubrication properties.
- Tested to ensure superior chain cutting efficacy and longevity

## CHARACTERISTICS

TEST	TYPICAL RESULTS	
Oil type		CB150 Cutterbaroil
Density 20 °C	Kg/L	0.885
Viscosity 40 °C	cSt	>150
Viscosity 100 °C	cSt	>15
Viscosity Index	N/A	135
Tackifier	%	2.5%
TBN	N/A	>5
