

PRECISION LUBRICATION

TWO STROKE HEAVY DUTY ULTRA GUARD

Description

This is a next generation OAT extended life, Nitrite free heavy duty ethylene glycol engine coolant premixedand ready to use.

OAT Antifreeze/coolant is an extended life ethylene glycol coolant for heavy duty diesel, gasoline and naturalgas powered engines.
It contains OAT corrosion inhibitor technology that provides effective corrosion protection of engineand cooling systemmetals.
The product is free of nitrites, amines, borates and silicates, it is pre-diluted and suitable for both heavy and light duty applications making it ideal for use in mixed fleet.
It requires no further dilution.

Applications

This product is suitable for all grease application. It is especially suitable for lubricating pins and bushes and grease-lubricated roller bearings running at low speed, because of the special EP additives it is particular recommended in off highway heavy load wheel bearing conditions at normal and high temperatures.

Features/Benefits

- All climate year round performance provides freeze protection down to -34°C and boil over protection up to +108°C
- Extended life capability up to 9000 hours or 600 000 km in heavy duty applications under normal operating conditions, provided the coolant is checked and kept in good condition.
- Field compatibility – it is miscible and compatible with other engine antifreeze of similar type, although to get the best performance, it is always recommended to not dilute or mix with other coolants.
- Main applications are heavy duty diesel or gasoline engines and found in on-road, off-road, marine, and mining and construction equipment.
