PRECISION LUBRICATION

CALCIUM GRAPHITE NO3 EP3 GREASE

Description

Graphite Grease No. 2 R is premium quality adhesive lubricating grease, containing high concentration of finely dispersed fully synthetic graphite powder (22%).

Applications

Graphite Grease No.2 R is recommended for applications where water washing/contamination may be a problem. It provides good protection against rust, corrosion and shock loading.

The graphite reduces friction, prevents seizure and acts as a reserve lubricant if the grease runs off due to overheating.

Typical uses are in pump glands, open gears, pins, bushes and linkages and on screw threads for prevention of seizing.

This grease is not recommended for rolling element / anti friction bearings

TECHNICAL DATA

TEST	TYPICAL RESULTS
NLGI Number	2
Penetration @ 25 0C	220 – 250
Drop Point, 0C	>90
Colour	Black
