

HAND CLEANER

Description

Hand Cleaner is a high grade, fast-acting, anti-seize formula based on a mixture of oils and penetrants in a blend of solvents. It penetrates corrosion, and loosens rusted bolts and parts.

Applications

Ideal for freeing nuts, bolts, screws, studs, pins, valves, machine parts, pipe couplings and pulleys. Can also be used for cleaning rusted surfaces of moulds, dies and heavy tools and for softening or removing carbon deposits.

The product frees seized components rapidly and will lubricate and protect against further corrosion. It penetrates deeply and deposits a specialized corrosion inhibiting lubricant to facilitate re-assembly. It will not damage metals, alloys, paint, rubber, plastic or wood.

Shake well. Apply to rusted parts. Allow to soak. Tap or vibrate parts to enhance penetration.

Features/Benefits

- Frees stuck nuts, bolts and locks
- Dissolves rust and cuts through grease
- Low odor, 0% VOC and safe on painted surfaces

TECHNICAL DATA

TEST	TYPICAL RESULTS
APPEARANCE	Amber Fluid
ODOUR	Hydrocarbon
SG @25°C	0.76
PRESSURE @ 25°C	2.7 Bar
DISCHARGE RATE	1.3g/sec
SOLUBILITY	Soluble in solvents, insoluble in water and alcohol
FLAMMABILITY	Extremely flammable
FLASHPOINT	N/A

Note : Ensure adequate re-lubrication intervals are carried out according to working temperature ranges used.
