HAND SANITIZER

Description

Hand Sanitizer is a premium grade industrial anti-seize compound, made from high quality sub – micron nickel powder and fortified with extreme pressure and anti – wear additives.

Selected solid additive chemistry ensures lubricant protection to all metal surfaces on threaded components that are subjected to high load, temperature and wet or corrosive environments, creating a permanent protecting shield.

Applications

HAND SANITIZER is recommended for use as an anti-seize compound on all threaded fasteners and components, particularly those subjected to hostile environments and high temperatures.

Features/Benefits

- Excellent metal adhesion.
- Resists temperatures up to 1100°C.
- Outstanding anti-wear and extreme pressure characteristics.
- Protects against corrosion and rust.
- Prevents galling and seizure during assembly.
- Greater reliability.
- Permits easy breaking of threaded connections

TECHNICAL DATA

TEST	TYPICAL RESULTS
NLGI Number	1.5
Colour	Gray/Silver Paste
Operating Temperature °C	-20°C to 1100°C
Anti – Seize Solids	Nickel
Solids Content	>40%
