PRECISION LUBRICATION

MATERIAL SAFETY DATA SHEET

Product Name	10W SPC675 Heavy Duty ULTRA GUARD
Product Code	
Synthetic	Not Classified
Labelling for Transport	Not Classified

SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Product Name	10W SPC675 Heavy Duty ULTRA GUARD
Supplier	NOVA INDUSTRIAL CC
Updated	April 2023
Review	April 2025
CAS Number	N/A
UN Number	N/A
Health Emergency Telephone	(011) - Red Cross Poison
Transport Emergency Telephone	(011) 311-2947 (Voluntary)

SECTION 2. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients considered Hazardous to Health:

Mixtures Oilsfatles (petroleum) solvent-dewaxed heavy paraffinic		60-100%
CAS-Number: 64742-65-0	EC number: 265-169-7	REACH registration number: 01-2119471299-27-XXXX

A petroleum product. DMSO extract < 3 % weight (IP 346)

Classification	Classification (67/548/EEC or 1999/45/EC)
Not Classified	

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.
Additional Information: This is a petroleum product which in its use rapidly degrades in either exempt from registration, does not meet the minimum volume threshold for registration, the registration date has not yet come due or this information is proprietary.

SECTION 3. HAZARDOUS IDENTIFICATION

US OSHA Hazard communication Standard	Product assessed in accordance with OSHA 29 CFR 1910.1200 and determined not to be hazardous.
Note	Under normal conditions of intended use, this product does not pose a risk to health. Excessive exposure may result in eye, skin and respiratory irritation.
Emergency Response Data	Lubricating Grease

SECTION 4. FIRST AID MEASURES

Inhalation	Not expected to be a problem. However, if respiratory irritation occurs due to excessive exposure, remove to fresh air. If breathing is irregular or if breathing has stopped, assist ventilation with mechanical device or use mouth-to-mouth resuscitation.
Skin	Remove contaminated clothing. Dry wipe exposed skin and cleanse with soap and water. Launder contaminated clothing before reuse. Obtain medical attention if irritation develops.
Eyes	Flush thoroughly with water. If irritation occurs call a doctor.
Ingestion	Not expected to be a problem. However, if discomfort occurs seek medical attention. Do not induce vomiting.

SECTION 5. FIRE FIGHTING MEASURES

Extinguishing media	Carbon dioxide, foam, dry chemical and water fog.
Special Fire-fighting procedures	Water or foam may cause frothing. Use water to keep fire exposed containers cool. Water spray may be used to flush spills away from exposure. Prevent runoff from fire control or dilution from entering streams, municipal water systems or drinking water supplies.
Special protective equipment	For fires in enclosed areas, fire fighters must use Self-Contained Breathing Apparatus.
Unusual fire and explosion hazards	None
Products of decomposition	Fumes, smoke, carbon monoxide, sulphur oxides, aldehydes and other decomposition products, in the case of incomplete combustion.
Flashpoint C	> 199 °C (ASTM D 92)

NFPA Hazard ID:

Health	0
Flammability	1
Reactivity	0
Hazardous decomposition products	Carbon Dioxide Carbon Monoxide

SECTION 6. ACCIDENTAL RELEASE MEASURES

Notification procedures	Report spill as required to appropriate authorities.
Procedures if the materials is released or spilled.	Report spills/releases as required to appropriate authorities.
Methods for cleaning up	LAND SPILL: Dike all areas holding normal safety precautions. Take measures to minimize the effects on ground water. Recover by pumping directly or absorption in suitable absorbent material. Contain solid residues in suitable disclaimed and remove mechanically into containers. If necessary, dispose of absorbed residues as directed in section 13.
Environmental precautions	Prevent spills from entering storm sewers or drains and contact with soil.
Personal precautions	See Section 13

SECTION 7. HANDLING AND STORAGE

Handling	No special precautions are necessary beyond normal good hygiene practices. Avoid prolonged contact with skin and eyes.
Storage	Keep containers closed when not in use. Do not store in open or unlabelled containers. Do not store near food sources, sparks, flames, strong oxidising agents and acidic materials.
Storage and handling procedures	Prevent each spills and leakages to avoid any hazard.

SECTION 8. EXPOSURE CONTROL/PERSONAL PROTECTION

Occupational exposure limits Distillates (petroleum) solvent-dewaxed heavy paraffinic
Provide adequate ventilation. Avoid inhalation of vapours. Observe any occupational exposure limits for the product or ingredients.
Eyewash complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Wear protective gloves made of the following material: Nitrile rubber. Polyvinyl chloride (PVC).
Eyewash complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Wear protective gloves made of the following material: Nitrile rubber. Polyvinyl chloride (PVC).

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. Wear protective gloves made of the following material: Nitrile rubber. Polyvinyl chloride (PVC).

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Liquid
Colour	Amber
Odour	Mild
pH	N/A
Boiling Point (Celsius)	N/A
Flash Point	> 220 °C (ASTM D 92)
Flammability	Flammable
Auto Flammability	N/D
Explosive Properties	N/A
Oxidizing Properties	N/A
Vapor pressure mmHg 20OC	< 0.1 kPa
Density at 20°C	0.885 g/cm3 @ 15 °C (ASTM D 4052)
Solubility in water	Negligible
Pour point:	-21°C
Viscosity	115 cst @100°C

N/A = Not Applicable, N/D = Not Established, D = Decomposes
For further technical information, contact your marketing representative

SECTION 10. STABILITY AND REACTIVITY

Reactivity	No specific test data related to reactivity available for this product or ingredients.
Chemical stability	The product is stable
Possibility of hazardous reactions	Fumes, smoke, carbon monoxide, sulphur oxides, aldehydes and other decomposition products, in the case of incomplete combustion.
Conditions to avoid	Extreme heat and high energy sources of ignition, such as sparks and static electricity.
Incompatible materials	Strong oxidizers
Hazardous decomposition products	Fumes, smoke, carbon monoxide, sulphur oxides, aldehydes and other decomposition products, in the case of incomplete combustion.

SECTION 11. TOXICOLOGICAL INFORMATION

Oral toxicity	Practically non-toxic (LD50, Greater than 2000 mg/kg). Based on testing of similar products and/or components.
Dermal toxicity	Practically non-toxic (LD50, greater than 2000 mg/kg). Based on testing of similar products and/or the components.
Inhalation toxicity	Practically non-toxic (LC50, greater than 5mg/L Based on testing of similar products and/or components.
Eye irritation	Practically non-irritating. (Draize score, greater than 6 but 15 or less). Based on testing of similar products and/or components.
Skin irritation	Practically non-irritating. (Primary irritation index: greater than 0.5 but less than 2). Based on testing of similar products and/or the components.
Other toxicity data	Although an acute inhalation study was not performed with this product, it contains a petroleum base oil which has been tested in animals for 4 weeks at 2 mg/L. These studies fail chiefly to affect other than a nonspecific inflammatory response in the lung to the aerosolized mineral oil droplets/particles. The significance of these findings with respect to man is the same amounts as in the present formulation) did not alter the elevated lung weights and that it is not may result in oil droplet deposition and/or granuloma formation.
Sensitization:	Not expected to be sensitizing based on tests of this product, components, or similar products.
Repeated dose toxicity	No significant adverse effects were found in studies using comparable dermal applications of similar formulations to the skin of laboratory animals for 13 weeks. Similar studies with vapour inhalation exposure for 4 weeks at saturated vapours. The animals were evaluated extensively for effects of exposure (hematology, serum chemistry, urinalysis, organ weights, gross/microscopic pathology). Based on similar and prolonged exposure may cause irritation to the eyes, eyes and respiratory tract.
Teratogenicity	No teratogenic effects would be expected from dermal exposure, based on testing of similar petroleum base oils. Based on testing of similar product formulations and/or materials of similar composition.
Carcinogenicity	Chronic mouse skin painting studies of severely hydrotreated mineral base oils showed no evidence of carcinogenic effects. Synthetic base oils have been tested in a battery of in vitro genotoxicity assays and have produced negative results. These base oils are not expected to be carcinogenic with chronic dermal exposures.

SECTION 12. ECOLOGICAL INFORMATION

Environmental fate and effects	Not established.
Biodegradability	This product is expected to be inherently biodegradable
Physico-chemical Removability	Absorption to sediment and soil will be the predominant behaviour.
Bioaccumulation	Minimal owing to low water solubility.

Ecotoxicity effects

Toxicity to aquatic organisms	This substance is practically non-toxic to aquatic organisms (LL50 >1000 mg/l).

Further information on ecology

Remarks	In the absence of specific environmental data for this product, this assessment is based on information for representative substances

SECTION 13. DISPOSAL INFORMATION

Dispose of waste at an appropriate waste disposal facility in accordance with current applicable laws and regulations, and product characteristics at time of disposal.

Limited pursuant to the Resource Conservation and Recovery Act. In addition, the product should be managed to an approved recycling facility or in the absence of one, a government approved disposal facility. Use of these methods is subject to user compliance with applicable laws and regulations and user characteristics at time of disposal.

Contaminated packaging: Empty containers retain residue (liquid and/or vapour) and can be dangerous. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to refill or clean container since residue is difficult to remove. Empty drums should be completely drained and safely stored and promptly returned to a drum reconditioner. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

Other regulations: The unused product, in our opinion, is not specifically listed by the US EPA as an acutely hazardous waste (P or U). It does not exhibit the characteristics which are listed hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrosivity, or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Flash Point: > 185 °C (ASTM D 92).

SECTION 14. TRANSPORT INFORMATION

This product is not regulated by the following: U.S. DOT (CFR), ADR, IATA and IMDG.

SECTION 15. REGULATORY INFORMATION

US OSHA Hazard
Communication Standard: When used for its intended purposes, this product is not classified as hazardous in accordance with OSHA 29 CFR 1910.1200.

Environmental Inventory
Status: All components comply with TSCA, EINECS/ELINCS, AICS, METI, DSL, KECI, ENCS, PICCS and IECSC.

EU Labelling: Product is not dangerous as defined by the European Union Dangerous Substances/ Preparations Directives. Eu appearing not required.

SARA

U.S. Superfund This product contains no "EXTREMELY
Amendments and HAZARDOUS SUBSTANCES".
Reauthorization Act SARA
Title III:
SARA (311/312) Reportable
Hazard Categories: None

The following product ingredients are cited on the lists below

Chemical Name	CAS Number	List Citations
Paraffinic Extract	64742-54-7	1,17

Note: products do not contain PCBs.

Information given herein is offered in good faith as accurate, but without guarantee. Conditions of use and suitability of the product for particular uses are beyond our control. We can therefore assume all risks of use of the product/ safe handling of the material/ the product as sold, remain entirely with the purchaser. No representation or warranty is given or to particular purposes in respect to the use or suitability of the product.

Health studies have shown that many substances pose potential human health risks which may vary from person to person. Information provided does not address individual use. This product should not be used for any other purpose than that stated without first seeking expert advice.

FIRST AID: Wash skin with soap and water. Flush eyes with water. If swallowed, by holes or vapour, remove to fresh air. If ingested do not induce vomiting. If symptoms persist seek medical attention. Avoid contact with skin and eyes by using appropriate protective clothing.

SAFETY: NOTICE: WARNING: If product is ingested into or under the skin, or
into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a doctor or a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

SAFETY: Under normal conditions of intended use, this product does not pose a risk to health. Excessive exposure may result in eye, skin and respiratory irritation. Lubricating grease. Use with adequate ventilation. Avoid ingestion and prolonged exposure.

DISCLAIMER
