**RENÉE VOLTAIRE**

# VIRTUE, DECADENCE AND RENÉE

*To be a consumer is not easy. Wanting to eat in step with your time but discovering that time is out of step with itself. In one moment, the public mood emphasises sustainability and responsibility, in the next it preaches unscrupulous indulgence. Climate change anxiety and health stress on Tuesday, a meat feast on Saturday. It's no surprise that study after study diagnoses consumers as having a split personality and a purchasing complex.*

*Renée Voltaire refuses to succumb to any of these pitfalls. Our approach is organic and plant-based, but also fun and innovative when it comes to flavours and design. Renée experiments and cooks at home in Stockholm, while the raw materials and inspiration come from all around the world. We keep meticulous track of every ingredient and have no intention of ever evolving into an industry. Yet we offer more than 100 items with around 25 new additions every year.*

*We refuse to compromise. Life is too long not to eat sustainably – and too short to not indulge occasionally. This is why we are trying to build a better world with knives and forks, a world that is in step with itself.*

*On the following pages you know how.*

# RENÉE VOLTAIRE BOOKS

*Nothing is as practical as a good theory. Because, if you want to learn to eat and drink healthily – and not fall back on your old, standard repertoire after one week – you need new knowledge. Of ingredients, techniques and tools. With knowledge comes aspiration, and with aspiration comes resolution. And that is when you really start cooking. Our books are for both everyday dining and special occasions, for the craving for sweet foods as well as to boost your nutritional competency. But they are always more for the kitchen than the coffee table. Because who wants to be healthy in theory only?*

# RENÉE VOLTAIRE BREAD & CRACKERS

*Our daily bread. Why do we say this? Maybe because bread always was such an important part of our table that it became synonymous with food. Which is a good reason to reflect on both its taste and contents. It's time to think both nutritious and delicious. Look to the past and find true craftsmanship, raw food and ancient grains. Look forward and do away with refined wheat flour, added sugar and preservatives. Take focus across borders and discover protein-rich millet, teff, chia and khorasan wheat. And voilà, our daily bread can be our daily treat.*

# RENÉE VOLTAIRE COOKING & SEASONING

*The kitchen has been a showroom for culinary skills for a long time. We want it to be a play area too. Because when we play, we are not slaves to any rules. We take our chances and jump, and either succeed or take a tumble. And the aftertaste is always a joy. However, we need to take care with our choice of playmates. There are no bores among our seasoning, and we have no bad apples in our raw materials. Additive-free, stored, fermented... Everything is carefully selected and tested in our own play area. And the semi-prepared products are no exception.*

And suddenly, there is agreement everywhere: between children and parents, between the everyday and party time, between conscience and indulgence. Everyone gets what they want.*

#### MATCHA WHISK • REAL BAMBOO

Handmade matcha whisk in real bamboo (Chasen).

A really good matcha whisk should have at least 80 bristles - ours has 100! The foam that forms when the Matcha is whisked in the right way (stir with an "M" or "W" motion) is as important as the crema in a good espresso. Eventually, the small knot in the center of the brush will "bloom" and the bristles will straighten. Rinse the whisk thoroughly in water after use and allow it to air dry.
