OUR -COMMITMENT

At Blue Coast Capital, we take our ESG (environmental, social and governance) responsibilities seriously. We're proud to have refurbished— and now manage & operate— Hyphen according to the principles and standards set out in ESG policy.

But what does that really mean for our tenants?

- Hyphen is an original 1960s building, which has been refurbished & extended to retain its original structure. Refurbishment (as opposed to demolition and rebuild) has been shown to reduce embodied carbon exposure by 50%
- The building is EPC 'A' rated— which is incredibly efficient for a retrofitted commercial building.
- Hyphen is fully electric-powered, and supplemented with solar PV panels on the roof.
- Super-efficient LED lighting is used throughout the building.
- Aircon is via by a variable refrigerant flow (VRF) system with heat recovery, which cools on a per-zone basis, making it highly efficient.
- Electricity intensity has been calculated at 77kWh/m2 per year, which is 55% better than typical practice and 37% better than best practice.
- Day-to-day tenant wellbeing is bolstered by our superb on-site facilities and fantastic location close to local amenities—and we also organise regular pop-ups and events for tenants.
