

CONNECTICUT HOA: SYNERGY OF TRYMARINE WITH TRADITIONAL LAKE TREATMENTS

“The pond looks nice, and the kids have been pulling fish out of the pond for the first time in years!”

- HOA Representative

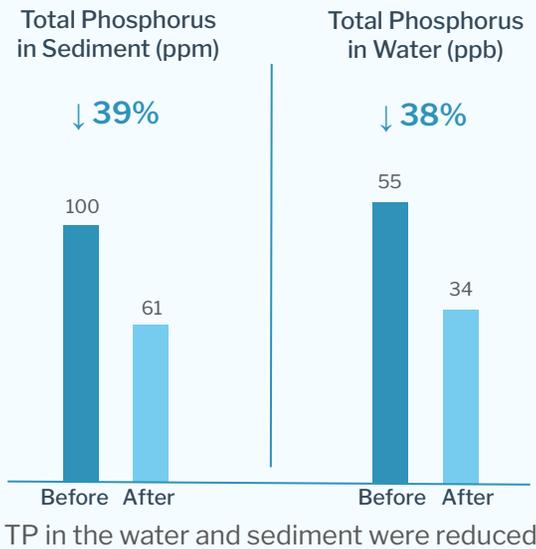

CLIENT OBJECTIVES:

1. Restore Aesthetics
2. Reduce Accumulated Muck
3. Improve Fishing - community had trouble catching fish because of the sick ecosystem

LAKE DETAILS

- ▶ Size: 4 acres; 2' average depth
- ▶ Location: Connecticut
- ▶ Treatment Period: May-Sept (biweekly)
- ▶ Program: TryMarine Muck Reduction + Herbicide

SEDIMENT AND WATER METRICS

TRYMARINE IMPACT

- ▶ Reduced total phosphorus in the sediment and water; reducing reliance on episodic treatments
- ▶ Reduced low oxygen incidents and fish kills often associated with herbicide treatment
- ▶ Applied together, with mild herbicide treatments, restored aesthetics and ecosystem balance

APPEARANCE IMPROVEMENT
