VOD Transcoding: Cambria FTC and Cluster

Cambria FTC is a smart, innovative, next-generation transcoding software that is highly scalable and designed to seamlessly fit into your workflow.

Cambria Cluster manages multiple Cambria FTC machines over your network for high-volume, faster-than-real-time transcoding. It helps customers organize and process video more efficiently using video/audio recognition and video analysis. It also performs additional video processing while transcoding and supports the latest video and audio codecs, including Dolby Vision, Dolby Atmos, and HEVC 4K formats.
