

40 Prospect Ave, Princeton, NJ 08540

Aman Dutta  
Vice President  
Princeton Prospect Foundation Meeting  
16 February 2026

#### Membership:

- This latest recruitment cycle has been reporting strong numbers of students with diverse backgrounds for our club.
- From amongst our new sophomore class, we plan to recruit around seven sophomore officers to join our officer corps.
- We will send out our annual survey to our membership in the Fall.
- We continue to provide a fun and inclusive atmosphere for members to interact and meet each other.
- We allow members to advertise around the club for events and performances which our members are participating in and are passionate about.
- Our officer corps is also focusing on expanding our social media presence and ensuring our members' easy access to information. To relay information quickly, we use email and GroupMe, and use Instagram to engage with members and non-members more often.

#### Education:

- To further encourage members to engage with faculty, we allow members to invite professors to meals without using one of their allotted guest meals.
- We look forward to continuing our successful weekly language table program, which was started years ago.

#### Community and Service

- We have continued the position of Community Chair with a number of exciting plans to develop new initiatives to help enrich our community. We are fielding suggestions to foster meaningful interactions.
- We are open to collaborating with other eating clubs in performing meaningful community service.
- We participate in ShareMyMeals so our extra food can go to families in need.

- We organized several community service trips for our members to the Friends of Princeton Open Space's volunteer stewardship initiative. We plan to continue a general community service program for members as well.

#### Technology

- We continue to maintain and upgrade our technology annually to provide educational and extracurricular support to our members.
