Why Latin Series-Translation

Training in English, then, as a result of careful translation from Latin, is here set down as the first and most important reason for studying Latin. To my own mind this reason weighs more than all others combined. Let us examine more in detail how translation from Latin give such admirable training in English.

Translation is a severe exercise. The lexicon or vocabulary tells the meanings of words, and the grammar states the force of inflected forms, but it is only after the pupil, provided with this equipment, has attacked his Latin sentence with a view to translation that the real struggle begins.

His vocabulary may have given him a dozen or even twenty meanings under a single verb or noun, and the pupil must reflect and carefully discriminate before he can choose the right word, the one just suited to context.
