OLOID Time Clock

OLOID Time Clock with Workday

- Workday-certified time clock application deployed on off-the-shelf tablets

- Secure authentication via Face, Badge, NFC, QR code, or PIN

- Supports Workday schedules to prevent out-of-shift punches

- Offline operation in case of network disruption, with automatic re-sync

- Punches can be tied to Workday project and cost allocations

- Integrates seamlessly with Workday Time Tracking

Benefits at a Glance

- Eliminates buddy-clocking and time theft

- Accurate worker records through automated syncs

- Cuts overtime-related payroll costs

- No proprietary hardware required

- Reduces congestion during shift changes

- Built-in privacy & regulatory compliance controls

Security & Compliance

✓ Compliance with labor laws through accurate time tracking, meal break attestations, and overtime regulations

✓ Comprehensive audit trails with detailed event logging

✓ Secure login into Workday with options for MFA compliance and robust session management

✓ Privacy-first architecture aligned with data privacy regulations (e.g., GDPR, CCPA, BIPA)

Customer Success Story

A leading roofing and building-supply distributor with hundreds of sites in the U.S. modernized their time tracking with OLOID + Workday.

Challenges

- Risk of labor law compliance violations

- Payroll leakage & time theft

- Burdensome manual corrections

OLOID Solution

- OLOID Time Clock integrated with Workday

- Contactless authentication using Face

- Fast clock-ins with offline capability

- Built-in privacy & compliance safeguards

Results

✓ Labor law-compliant, accurate clocking data

✓ Reduced manual payroll corrections

✓ Faster, easier clock-ins across hundreds of sites
