

GREEN OFF AG

POWERFUL AND USER-FRIENDLY DISINFECTANT FOR THE REMOVAL AND CONTROL OF GREEN DEPOSITS

Authorisation number BE-REG-02125

Facade cleaning | Cleaning products

ADVANTAGES OF GREEN OFF AG

- ✓ Powerful deep-acting formula
- ✓ Ready-to-use disinfectant
- ✓ Long-lasting protection against green deposits

Description

GREEN OFF AG is a powerful, ready-to-use cleaning and disinfecting agent designed for the removal and control of green deposits on various exterior surfaces.

The product is suitable for substrates such as plastics, wood, ceramic surfaces, roof tiles, slates and façades. Thanks to its specific formulation, GREEN OFF AG penetrates deeply into the pores of the substrate and provides long-lasting protection against green deposits.

Properties

- Powerful deep-acting formula
- Ready to use (apply undiluted)
- Self-cleaning effect
- Long-lasting action against green deposits
- Does not leave stains or mark
- Easy to apply

Substrate

GREEN OFF AG is suitable for cleaning various exterior surfaces, such as:

- Facades
- Roofs (roof tiles, slate)
- Terraces and driveways
- Plastic and wooden structures

GREEN OFF AG is intended for the removal of algae, moss and green deposits, and for the control of bacteria and fungi. The product has an **algaeicidal, bactericidal and fungicidal action**.

Target organisms: bacteria, fungi, algae, lichens, moss and green deposits.

Application instructions

Apply the product undiluted evenly using a soft brush or by spraying (low pressure only) onto a dry substrate. Application should be carried out in dry weather to achieve maximum effectiveness of GREEN OFF AG.

The product does not leave stains or marks.

Consumption

± 0.1 – 0.2 L/m²

1 litre treats approximately 5 to 10 m² (depending on substrate absorption and level of contamination)

Technical characteristics

Aspect	Liquid
Density	0.999 kg/l at 20°C
pH	8.2
Solvent	Water
Odour	Characteristic

Security

Use biocides safely. Always read the label and product information before use.

Use of this product may result in temporary and local contamination of water and soil. Take appropriate measures to prevent environmental spread.

Refer to the latest Safety Data Sheet (SDS) for further information.

Distributed by  Industrieweg 6, B-2630 Aartselaar

Remarks

- Do not mix with other cleaning agents.
- Do not apply during rain, imminent rain, frost or imminent night frost.
- In order to allow the product to take effect optimally, do not process directly in full sun.

Cleaning of equipment

With water immediately after use.

Storage / Shelf life

- Keep only in the original container in a cool, well-ventilated place. Opened containers should be carefully closed and stored upright to prevent leakage.
- 1 year after production in the original closed packaging.

Packaging

5 liters (item no. S10511)

10 liters (item no. S10512)

25 liters (item no. S10513)

Legal Notes

The information and recommendations contained in this document have been prepared in good faith based on the current knowledge and experience of Reynchemie, concerning products that are correctly stored, handled and applied under normal conditions and in accordance with our guidelines. Since practical conditions, materials and substrates may vary from one application to another, Reynchemie cannot guarantee the merchantability or suitability of the product for a particular purpose. The user remains responsible for carrying out preliminary tests to verify the compatibility of the product with the intended application. All stated values and properties are average results determined at 20 °C; reasonable deviations are acceptable. Products used in combination with this product within the same application system (such as preparation or finishing products) must always be applied according to the instructions provided in their respective technical data sheets.
