

Redefining Air Sourcing with Strategic Intelligence

For forward-thinking, future-oriented Corporate Travel Managers

What is Air Sourcing Navigator?

Air Sourcing Navigator is the definitive application for optimizing corporate air programs. It cuts through fragmented data from over 200 sources to deliver a unified, real-time view of your entire air program. By leveraging advanced data science, it finds hidden savings and renegotiation opportunities, empowering travel managers to drive unparalleled savings and a strategic advantage.

Transformative Results

- » **Unparalleled Savings:**
Drives significant cost reduction opportunities.
- » **Strategic Advantage:**
Empowers data-backed decision-making.
- » **Long-Term Success:**
Ensures continuous program optimization and sustainability.

“The Air Sourcing Navigator empowers clients to make better decisions, transforming data and predictive insights into a powerful, AI-led approach to air sourcing.”

Keesup Choe, CEO, PredictX

Unmatched Value Drivers

Unrivaled Intelligence:

Our platform delivers actionable insights by integrating booking data with contract details for immediate performance analysis.

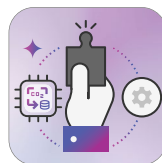

Air Contract Benchmarking:

Measure your travel spend against industry standards and similar-sized companies to gain a competitive edge in sourcing negotiations.

Data-Backed Negotiations:

Arm yourself with dynamic insights and quantifiable data to level the playing field with suppliers.

Global Compliance and Sustainability:

Air Sourcing Navigator helps you measure and mitigate carbon emissions and streamlines compliance with regulatory changes through Agentic AI-driven tracking and analysis.

Core Capabilities

Unifies Fragmented Data

A single source of truth is created by unifying data from over 200 sources.

Delivers Strategic Insights

Insights are based on robust industry benchmarks and your company's unique data.

Unlocks Hidden Savings

The platform uses Agentic AI to find savings and renegotiation opportunities on specific routes, carriers, and travel classes.

Powers proactive optimization

Air Sourcing Navigator enables you to continuously monitor your air program and make proactive decisions.

The future of air sourcing isn't about looking at what happened yesterday; it's about anticipating what's next. We are transforming fragmented data into a clear strategic roadmap, giving travel managers the foresight and power to master their air program.

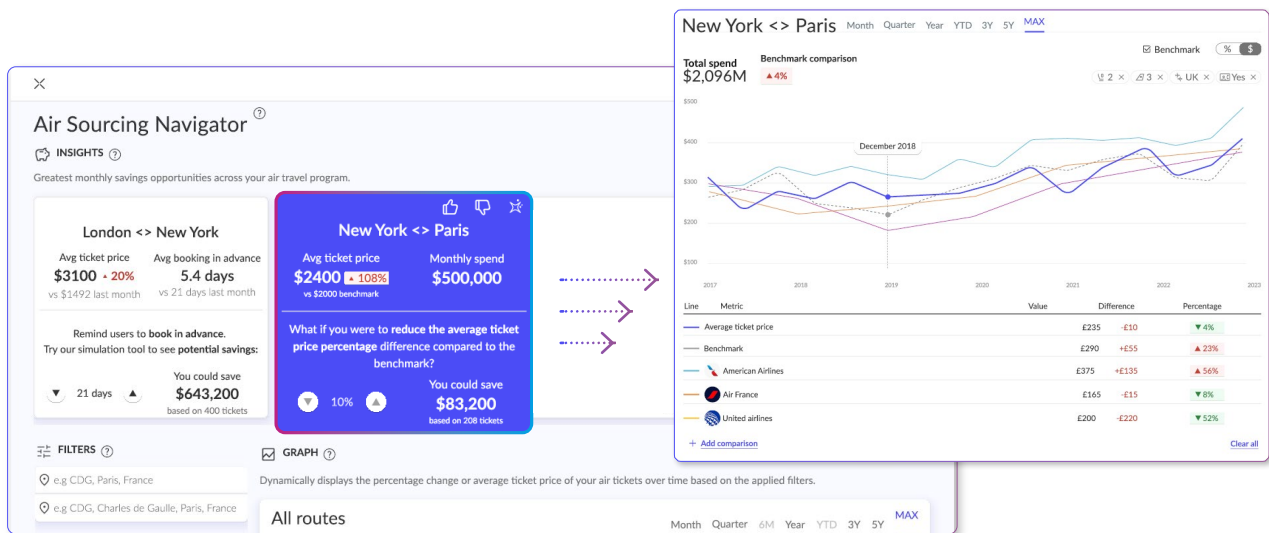

Use Cases at a Glance

» Air Travel Managers:

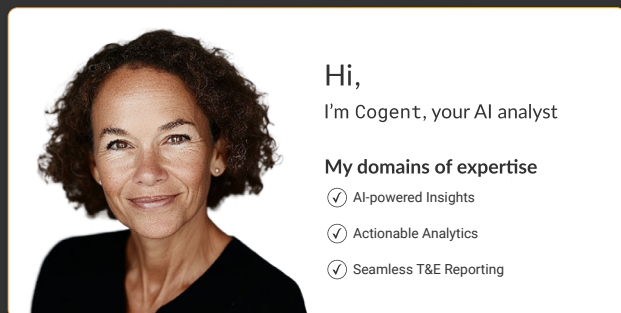

Confidently negotiate with airlines by leveraging real-time data and actionable insights to optimize contracts and drive cost savings.

» Procurement Teams:

Use robust benchmarking to measure travel spend against industry standards and gain a strategic advantage in negotiations.

ASN Powered by Cogent Agentic AI

Conversational Intelligence in Action:

"For our top 10 routes, provide a performance analysis of our preferred carrier versus three competitors, including average fare and market share."

"For a budget review, forecast the potential savings on our most expensive international route if we shift 20% of business class to premium economy, with a 12-month breakdown."

Cogent, our award-winning Agentic AI framework acts as a personal assistant that revolutionizes T&E management. It's a dynamic system that can autonomously handle complex questions and perform the task of a "virtual full-time equivalent" for your team. This intelligence transforms your data into proactive, strategic decisions.
