# OUR JOURNEY

Bolsas y Mercados Argentinos (BYMA) is the result of the de-mutualization and asset reorganization of the local capital markets.

Operating Margin 2024. Total: 174 MM USD

The 2012 law reduced the number of exchanges down from 21.

BYMA is the largest exchange covering all asset classes and holding the only CSD in the country.

We have partnered with leaders in technology (such as Nasdaq and LSEG) to modernize and scale our platforms.

We have invested heavily in platforms and network which allowed very significant growth.

| Margin EBIT                     | 75,5%        | 75,4%        |            |
| <b>Financial Income</b>         | 130,1        | 97,0         | -25%       |

**Nominal values expressed in USD MEP – does not include inflation adjustment**

- Strong business growth, thanks to increased volumes driven by client growth for Exchange and price recovery and asset growth driving Depository.
- Operating Expenses growing due to greater volumes – 26% are variables: Taxes(IIBB) and other CSD. And several one offs in 2Q25.
- EBITDA and EBIT growing over 30% in USD.
- Lower Other Operating and Financial income due to higher rates returns in 2024 and mark to market in 3Q25.

# INCOME DRILL DOWN SHOWS DRAG FROM CSD

CSD revenues are still bellow pre-crisis levels, whereas Exchange revenues grew by +5X

# Key Exchange Activity Indicators last 3 years

## ADTV BY ASSET CLASS

## ACCOUNTS WITH ACTIVITY BY MONTH

# ACTIVITY INDICATORS OF THE LOCAL CAPITAL MARKET

Total Accounts quarter end

New Accounts Opened per day - Avg Quarterly

Total Private Sector Financing USD (MEP)

September was only 10% of –YTD average  
First 15 days of November have doubled the annual average

# DRAG FROM CSD REVENUES COMES FROM UNDERVALUED ASSET LEVELS

- AUCs measured in USD are 34% down from peak.
- Revenue is 21% down from peak due to additional services line – foreign activity.
- Face Value has grown due to asset composition change with more bills than bonds.
- This should normalize as with asset prices.

# BYMA'S REVENUE EX FINANCIAL INCOME SHOWS GROWTH AND EFFICIENCY

Looking at growth of income and margin ex operating income, shows the real growth of the underlying business and the extent of the efficiency gains.

- Operating Financial income makes up 25% of total revenue.
- Total revenue ex financial income 2X the 2018 peak levels.
- Efficiency at all time highs

Total Non Financial Revenue and Margin does not include any financial income..

## BYMA'S TOTAL OPERATING MARGIN ABOVE PRE-CRISIS LEVELS

Our total operating income is 64% above 2018 peak levels thanks to growth in the business, but our operating margin is almost 2X thanks to higher efficiency.

- Total operating revenue above 2018 peak levels.
- Efficiency at all time highs – Operating Margin also record.
- But adjusted share price is below 2018

# UPSIDE FROM ARGENTINA “NORMALIZATION”

Reaching Latam average implies 3X upside

## Key levers to achieve upside

- Labor reform, externalization of wealth and x-sell will allow continued growth in retail investors: ~2X
- Full elimination of capital market restrictions: +25%
- Reappearance of foreign investors: +25%
- Price recovery: ~1X
- Local debt issuance: up 33% YTD vs previous year
- New IPOs – privatizations and companies in strategic sectors
- Re-introduction of private pensions / retirement insurance

(\*) This slide is the only one showing inflation adjusted figures.All others show historical values (not adjusted by inflation)

# DEPOSITORY: CONTINUED AUC GROWTH

Assets under custody (AuC, Q3 2025 average) showed a 68% year-over-year increase in nominal value and a 45% year-over-year increase in market value, both above inflation of 39% for the period.

Growth was higher quarter-over-quarter, mainly due to the normalization of Treasury bill rollovers and a slight recovery in equities (+4% S&P Merval). Corporate Bond issuance saw very low levels in September: barely 10% of the annual monthly average.

AuC, by asset class, at market value

Assets Under Custody (AuC) at face value, quarterly evolution  
(in thousand millions)

Assets under Custody (AuC) at Market value, quarterly evolution  
Thousand millions

# DEPOSITORY: INCOME CONTINUES TO GROW

The Depository's revenues totaled ARS 15.8 billion, representing a 58% year-over-year increase, exceeding the growth of AuCs measured at market value.

This is the last quarter in which equity custody fees are charged over face value; they will be charged over market value starting October 1, 2025

|                     | 3Q 24 | 3Q 25  | YoY \$ | YoY % |
|---------------------|-------|--------|--------|-------|
| CSD (ARS Millions)  | 9,983 | 15,808 | 5,825  | 58%   |
| ADC Services        | 6,101 | 9,910  | 3,809  | 62%   |
| ACRyP Services      | 107   | 196    | 89     | 83%   |
| Additional services | 3,775 | 5,702  | 1,927  | 51%   |

# EXCHANGE: JUMP IN LEVEL OF ACTIVITY

Market revenues (ARS 47.14 billion) grew 114% compared to Q3 2024. All asset lines reflected strong growth.

| EXCHANGE (ARS Millions) | 3Q 24  | 3Q 25  | YoY \$ | YoY % |
|-------------------------|--------|--------|--------|-------|
|                         | 21,984 | 47,142 | 25,159 | 114%  |
| Trading C&S fees        | 18,197 | 38,550 | 20,354 | 112%  |
| Market Data             | 1,350  | 1,578  | 228    | 17%   |
| Other fees              | 2,437  | 7,014  | 4,577  | 188%  |

The quarter showed the positive impact of monetary policy changes and the launch of new trading methods to capture those flows.

Fixed income became the largest contributor to income for the first time.

## EXCHANGE: EQUITY CONTINUED TO SHOW GROWTH

Total revenue from equity trading was ARS 15,072 million, which was 83% higher than the same quarter of the previous year.

The local macro environment – specially from September onwards – led investors to shift towards trading Cedears, whose ADTV grew 38% QoQ . The local equity segment saw almost no change during the quarter.

The difference between volume growth and revenue growth is due to the increased activity of Cedear market makers and due to the fees reduction from 8 bps to 7 bps on July 15th.

As of October 1st, the equity trading commission decreased from 7 bps to 5 bps.

# EXCHANGE: FIXED INCOME SHOWED STRONG GROWTH

Interest rate volatility, coupled with monetary policy changes, led to revenue growth of 119% year-over-year. We maintained a market share of over 75%.

Fixed Income ADTV Guaranteed Segment  
ARS Millions.

Fixed Income ADTV Guaranteed Segment  
ARS Millions.

Fixed Income Revenues  
ARS Millions

The new simultaneous transactions segment accounted for most of the volume increase. This segment offers discounts because it involves two concurrent transactions.

## EXCHANGE: ON-EXCHANGE REPO SAW A SIGNIFICANT JUMP IN VOLUME

The volume of on-exchange repo continued its growth: increasing 172% year-over-year and 66% quarter-over-quarter. The policy of limited growth based on the risk taken remains in place.

In total, income from this category reached ARS 9.5 billion. The QoQ and YoY increases were very significant.

These increases are primarily due to the shift to a more efficient risk model, which involves greater proactivity in requesting collateral and the elimination of capital restrictions per entity. This is further complemented by the introduction of simultaneous transactions, which enabled greater arbitrage of spot interest rates.

# DATOS DE MERCADO: MAYOR CRECIMIENTO TRIMESTRAL POR TC OFICIAL

Revenue from this business line increased 17% year-over-year.

Temporality of payments from vendors impacted this business line, which is expected to recover in the next quarter.

Expenses breakdown

The increase in expenses was above inflation for Q3 2024/Q3 2025 (39%). This is mainly due to an increase in gross income tax due to business growth, and the growth in technology expenses, both capital expenditures (Capex) and operating expenses (Depreciations).

In this last category, we can highlight the upgrade of Gara to expand its processing capacity due to increased activity, and the launch of first stage of AI assisted Software Development.

# FINANCIAL INCOME BACK TO AVERAGE

The investment portfolio was 70% dollar-denominated at the end of the quarter, following dividend payments and decisions by the Investment Committee.

The higher devaluation in the quarter had a larger contribution to financial results.

# EFFICIENCY: WE CONTINUE TO ACHIEVE OUR OBJECTIVE

The EBITDA margin for the last 12 months remains at a record high of 76%.

The operating margin – which excludes financial income – also remains at a record high.

El margen operativo no toma en cuenta ingresos financieros. El margen EBITDA toma en cuenta ingresos operativos financieros.

# Highlights

## FINANCIALS 3Q25 VS 3Q24

- Income: ARS 66,664 M, +61%
- Total Expenses: ARS 17,702 M +62%
- Financial Income: ARS 25,476 M -20%,
- EBITDA: ARS 49,444 M +60%

## EFICIENCY

- LTM EBITDA Margin: 76%
- Operating Margin: 69% YTD

## HIGHLIGHTS

- The ruling party's election results allow for the acceleration of labor and tax reforms. This is positive because it will increase disposable income and broaden the base of individual investors.
- Pension reform will follow.
- Privatization of public companies through the capital markets continues.

## KEY PROJECTS

- AI-Assisted Software Development: TTD: 91.25% reduction (from 180 to 15 days).
- Change Fail: 81.15% improvement. Bug Rate: 75% reduction.
- Migration to FIX Router: RTT reduced from 8.53 ms to 3.88 ms, accelerating order entry and market data.
- Nasdaq Project for CCP / BYMA Digital Assets
