# WHO ARE WE?

GigBox Artist Portal is the most complete utility for helping the musician or artists manage their careers no matter where you are in it. It is a professional Software as a Service (SaaS) for those who are professionals and those who want to be professionals. GigBox's extensive features allow you to gain control of your operating environment gig by gig.

We employ a process we call the full lifecycle of a Gig that will allow each artist/musician to quickly budget out all elements of the Gig from transportation, and accommodations, payroll, management fees and any ad-hoc or inadvertent costs that can be estimated while the offer is still on table giving you a powerful decision making

toll as you navigate the artists environment.

The importance of the framework of the lifecycle is that it allows you to access gig/event/tour metrics quickly prior to offer acceptance as well as post gig/event/tour analysis that can assist you in the profitably you are seeking.
