

CONNECT WITH DRIVERS ON THE GO THROUGH PS MEDIA MANAGER

Say goodbye to time-consuming paperwork and hello to fast fleet file sharing with PS Media Manager.

THE RIGHT FILE, RIGHT IN THEIR WORKFLOW

Send drivers everything they need—from manuals to cab cards—directly inside PS Workflow. Files open with a single tap, no app-switching required.

ONE TAP ACCESS TO EVERYTHING

Simplified search and tagging enable drivers to quickly find exactly what they need, reducing downtime and support calls.

BUILT-IN SAFETY COMPLIANCE

Require acknowledgment before drivers start a task. Ensure every driver reviews safety materials, procedures, or job-specific instructions.

STOP PRINTING, START SAVING

Go digital and eliminate printing costs. Send insurance cards, ELD manuals, or route documents electronically so drivers always have the latest version in hand.

TARGETED FILE DELIVERY

Share files with specific drivers, terminals, or groups to ensure the right people receive the right information at the right time.

ALWAYS UP-TO-DATE

Send large media files over the air with WiFi Assist. Drivers receive updates automatically, even while they're on the road, without using cellular data.

PS MEDIA MANAGER

Feature Spotlight

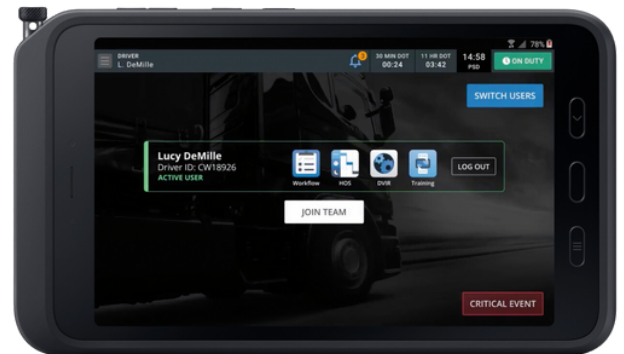

WIFI MEDIA DOWNLOADS

WiFi Assist helps your fleet stop using data to download media by providing a fleet-approved WiFi source to download safety documentation, yard layouts, and any other media while your drivers are on break.

SMART LINKING

Using smart links within PS Workflow or Messages makes it easy for drivers to access the media they need with a single click.

TRAINING VIDEOS

Media Manager is a great place to store training videos so drivers can review a clip before calling the back office when they have questions.
