THE IDLE SMART SYSTEM

Idle Smart is a simple and cost-effective alternative to APUs, and an excellent add-on to eAPUs and bunk heaters. Get automatic idle management, keep drivers comfortable, and protect against no-starts, right from your desk.

YOUR FLEET GETS:

SmartPortal Access

Stop Wasting Fuel

Get a detailed view of idle activity to pinpoint and eliminate unnecessary idling.

Empower Your Drivers

Provide training to boost adoption and efficiency based on how you see drivers using the system

Total Control from Your Desk

Adjust idle parameters for your entire fleet in seconds—no shop visits, no downtime, no hassle.

Battery ProtectTM

Monitors battery voltage and automatically starts the engine to recharge when the voltage falls outside the parameters. It prevents no-start issues and extends battery life, especially for trucks with eAPUs.

Customize:

- Battery Voltage Range
- Recharge Run Time Range

Cold Start GuardTM

Monitors engine coolant temperature and automatically starts the engine when needed to prevent cold starts and fuel gelling. The engine runs until the target temperature is reached.

Customize:

- Engine Coolant Range
- Monitoring Intervals

Cabin ComfortTM

Automatically manages engine and HVAC system to maintain a comfortable cabin temperature while the vehicle is parked. It runs the engine only as needed to keep the cabin within your range.

Customize:

- Target Temperature

OUR COMMITMENT

Your Partner in Efficiency and Control

Idle Smart is more than your idle management solution; it's a partnership. We provide the tools, support, and insights you need to thrive in a competitive market.

Unmatched Support

Our dedicated Customer Success Managers are committed to helping you achieve a fast ROI and long-term success. From onboarding to installation and beyond, you'll experience a level of support so reliable, you'll wonder how you ever managed without it.
