

## Manage Your Entire Safety Operations In **One Place**

**EBE CORE** helps fleet safety, risk, and operations teams manage safety and compliance by centralizing fragmented data, automating workflows, and providing predictive insights, resulting in lower risk, higher driver retention, and operational efficiency.

EBE's solutions streamline hiring, safety, performance, and back-office processes, empowering organizations to focus on exception-based decision-making. By centralizing visibility across operations, EBE helps clients reduce manual effort, improve accuracy, and enhance fleet performance.

Disconnected systems slow fleets down and increase risk. Safety teams waste time hunting for camera events, compliance documents, and coaching history across multiple platforms. **EBE CORE** (*Compliance Operational Risk Engine*) unifies camera, coaching, and compliance data into one solution, giving you *full control*, *early risk detection*, and *24/7 audit readiness*. All activity is securely stored in EBE's integrated record retention system.

By centralizing every workflow, **EBE CORE** eliminates manual effort and brings clarity to complex safety operations. Fleets gain a scalable framework that improves accountability, strengthens compliance posture, and drives measurable reductions in risk.

## FEATURES + BENEFITS

### SPOT & COACH RISK

Spot unsafe behavior and give feedback that boosts accountability and retention

### METRICS → SAFER DRIVING

Rank drivers with customizable scorecards to spot top and at-risk performers for targeted coaching

### UNIFY SAFETY & COMPLIANCE

Consolidate cameras, training, telematics, and violations to cut manual tasks and admin work by 31%

### ACCESS ANYWHERE

Drivers can upload documents, complete training, and stay connected via SHIPSMobile™ or the Driver Portal anytime

### AUTOMATE COMPLIANCE

Monitor MVRs, HOS, drug tests, inspections, and DataQs 24/7 to stay compliant and reduce manual tracking

### DRIVE MEASURABLE ROI

Reduce incidents, FMCSA penalties, insurance costs, and minimize litigation exposure

*EBE CORE has completely transformed how we manage our fleet safety. With everything housed in one unified platform, we've cut administrative work, improved driver accountability, and gained real-time insights that help us stay compliant and reduce risk.*

-Colson Baker, Fleet Safety Director, Moline Transport

**EBE CORE** delivers measurable results that transform fleet safety and compliance. Fleets experience up to *47% lower insurance costs, 20% fewer DOT recordables, and 51% better CSA scores*, all while *keeping documents up to date in real time and ensuring 24/7 audit readiness*.

By unifying cameras, training, telematics, and coaching into one platform, **EBE CORE** reduces manual tasks, strengthens accountability, and gives your team full control over safety operations, helping you lower risk, improve performance, and protect your bottom line.
