

# Save Time and Money with PrePass Tolling & Violation Management

INFORM™ Tolling provides deeper insights and greater visibility into your PrePass tolling costs.

## Toll Management

- **Save time and avoid delays** with nationwide coverage on major toll roads and bridges.
- **Simplify accounting** with a single monthly invoice for all toll transactions.

## Visibility into Tolling Trends

- **Make informed decisions** with the INFORM™ Tolling dashboard, providing easy access to current and historical toll data.
- **Gain cost visibility** by tracking and comparing toll charges year-over-year to spot trends and unexpected costs.
- **Stay proactive** by setting alerts for unassigned transponders, high toll charges, or specific toll agencies.

## GPS Toll Verification

- **Prevent billing errors** using GPS data to verify when and where vehicles entered a tolling plaza and generated a toll charge.
- **Enhance accuracy** with integration through Platform Science, the PrePass Mobile App, or an API.

## Unassigned Transponders

- **Prevent unexpected charges** by easily tracking and investigating tolls from unassigned transponders.

## Toll Disputes

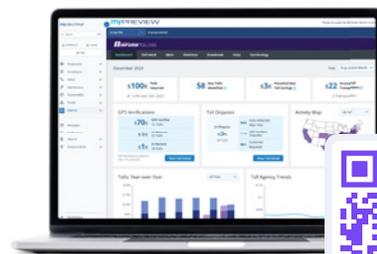

- **Resolve toll issues faster** with quick access to tolling data for informed decision-making.
- **Eliminate hassle** as PrePass files and manages toll disputes on your behalf.

## Toll Disputes

- **Reduce unnecessary toll expenses** by identifying max toll charges caused by missing entry/exit data.
- **Track and compare charges** from previous months and monitor dispute progress.

## Potential Max Toll Savings

- **Lower costs** by viewing estimated savings from successfully disputed max tolls.
- **Identify opportunities** with INFORM™ Tolling analytics that calculate potential savings.

# Expand Bypass Opportunities with the PrePass Mobile App

The PrePass Mobile App enables customers to easily start maximizing their bypass opportunities. Drivers can quickly download and begin using the mobile app to take advantage of weigh station bypass decisions and customizable alerts.

## Get more with the Mobile App

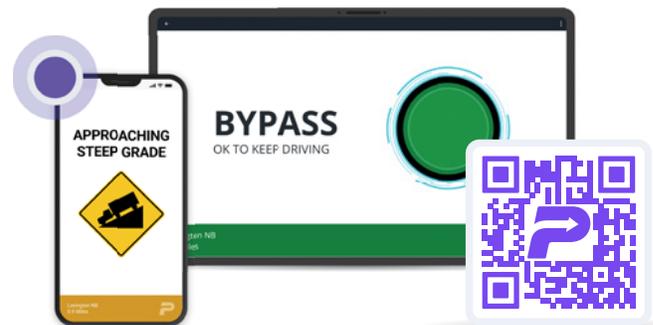

- **Bypass more weigh stations** by combining the PrePass Mobile App with transponders for greater coverage.
- **Stay on the road** with mobile-based bypassing at locations that don't support transponders, including temporary weigh stations.
- **No extra fees**—start maximizing bypass opportunities at no additional cost.\*

## Seamless integration with Platform Science

- **Enhance efficiency** by using the PrePass Mobile App within the Platform Science platform.
- **Stay connected** with key vehicle and ELD data while receiving real-time bypass notifications.
- **Simplify driver experience** with one platform for weigh station bypass notifications and customizable driver safety alerts.

## Customizable Alerts Keep Drivers Informed

- **Find parking faster** with real-time availability along major freight corridors.\*\*
- **Stay ahead** of severe weather with alerts for storms, extreme temperatures, water hazards, and reduced visibility.
- **Improve safety** with notifications for steep grades, brake check areas, construction zones, and accidents.
- **Prepare for weigh stations** with a 2-mile advance alert and clear bypass or pull-in instructions.
