

Toll Genius by Fleetworthy (Part of Fleetworthy Toll Management – Formerly Bestpass)

Connect **Toll and Telematics Data** for Accurate, Automated, and Actionable Insights

Toll Genius by Fleetworthy gives fleets a holistic view of toll activity across every vehicle, location, and trip. By integrating toll data from Fleetworthy with GPS insights from your existing telematics platforms, Toll Genius identifies mismatches, verifies transactions, and delivers analytics that empower smarter, faster decisions.

With automated validation and detailed reports, fleets gain the transparency needed to reduce violations, control costs, and improve billing accuracy.

Toll Genius has given our team visibility we've never had before. We can see every toll event, identify discrepancies instantly, and take action before they become costly errors.

Director of Fleet Compliance

HOW IT WORKS:

Toll Genius integrates directly within the Fleetworthy portal and connects toll data to GPS location and vehicle assignment information. This enables fleets to:

Validate Toll Transactions Automatically

Match every toll charge to GPS events for complete accuracy.

Identify Discrepancies

Flag mismatched or anomalous tolls for rapid review.

Streamline Data Management

Update vehicle and transponder assignments directly in the platform.

Optimize Fleet Performance

Use location-based reporting to refine routing, reduce costs, and enhance compliance.

Comprehensive Reports Available

Toll Genius provides a comprehensive suite of reports that help fleets validate toll activity, identify discrepancies, and forecast future expenses:

Toll Activity Map & Report*

Visualize toll locations and charges directly on an interactive map.

Toll Match Report

Categorize tolls as Match, No Match, or Anomaly to confirm data accuracy.

Toll Discrepancies Report

Identify root causes of mismatches, such as stationary vehicles or device misassignments.

Fleet Inventory Report

Compare Fleetworthy and telematics data to identify unmatched or uncovered vehicles.

Toll Miles Report*

Track total toll miles, costs, and cost-per-mile by vehicle or fleet segment.

Optimization Report

Analyze transponder vs. plate toll costs to identify potential savings.

Toll Forecasting & Estimate Profiles

Project toll costs by route or fleet size and prepare next-year budgets with confidence.

*Currently available only with a Geotab integration

With advanced analytics, detailed reporting, and seamless integration, Toll Genius delivers the visibility, control, and confidence fleets need to manage toll costs with precision.
