

DORAN

Doran 360™ Tire Monitoring

The Doran 360™ Tire Monitoring System integrates with Platform Science Fleet Enterprise and Fleet Plus to deliver real-time tire pressure and temperature insights to both drivers and fleet managers. With the intuitive in-cab tire monitoring app and the Doran Fleet Management Portal, fleets gain visibility that reduces road side calls, improves tire life, and boosts safety.

About Us

Doran is a global leader in safety and maintenance monitoring technology. Since 1953, Doran has developed innovative technology to help fleets keep their equipment in service while improving safety and reducing stress.

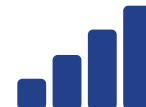

Doran 360™ Features and Benefits

**Increased Visibility
on Tire Issues**

**Reduce Operational
Costs**

Interface**

Driver Mobile App

Fleet Management Portal

“Our partnership with Platform Science is a game changer for fleets looking to lower their tire-related costs and improve vehicle safety. The ability to proactively monitor tire pressures and temperatures, in-cab & at the corporate office, helps fleets increase equipment uptime & improve their bottom line.”

– Lee Demis, VP of Business Development, Doran

Your Road to Smooth, Safe, and More Cost Effective Fleet Operations!

When you combine Doran 360™ Tire Monitoring and Platform Science telematics, it gives fleets a powerful, integrated solution for monitoring tire health from cab to command center. With real-time alerts, historical analytics, and automated reporting, fleets can operate safer, smarter, and more efficiently.
