CLARIOS

TRAILER BATTERY MANAGER™

Trailer Power. Without the Guesswork.

Monitor trailer battery health and charge status in real time, get proactive alerts when batteries are undercharged or nearing end of life, and take action before battery issues disrupt trailer operations.

ABOUT CLARIOS TRAILER BATTERY MANAGER

Trailer Battery Manager extends battery intelligence to the trailer, providing real-time visibility into battery health and charge status. Proactive alerts help maintenance teams identify undercharged batteries and batteries nearing end of life so they can act before issues disrupt critical trailer functions.

KNOW BEFORE A LOW BATTERY STOPS THE JOB.

Trailer battery issues are often discovered too late, when a liftgate won't operate or a delivery is already at risk. **Trailer Battery Manager** provides real-time charge and health visibility so fleets can act before battery issues result in costly delays or roadside assistance.

Avoid ***$700+*** per liftgate downtime event [1]

[1] *Typical cost of emergency assistance to power the liftgate so the trailer can be moved.*

FEATURES + BENEFITS

REAL-TIME BATTERY MONITORING

Monitor trailer battery health and charge status remotely in real time.

LIFTGATE READINESS

Identify insufficient battery power before it prevents liftgate operation.

PROACTIVE BATTERY ALERTS

Get alerted when trailer batteries are undercharged or nearing end of life.

COLD-CHAIN SUPPORT

Monitor battery health and charge to help maintain power to critical trailer refrigeration systems.

KEEP DELIVERIES MOVING

Take action before trailer battery issues disrupt operations and put deliveries at risk.

REDUCE COSTLY DISRUPTIONS

Help avoid battery-related roadside assistance and blocked loading-dock costs.

Trailer Battery Manager is a direct response to customer feedback. It empowers fleet managers to monitor trailer batteries remotely and take action before issues arise. That saves time, money, and frustration.
