

Green Innovation Report

AGC Inc. - 2024

ISIN: JP3112000009, **Ticker:** 5201, **Country:** JP, **Sector:** Building Products

This report evaluates the green innovation activities of the company over the past decade, based on inventions published in green technology areas defined by the [IPC Green Inventory](#). This inventory, established by the World Intellectual Property Organization, identifies technologies aligned with the United Nations' definition of Environmentally Sound Technologies. These innovations contribute to mitigating humanity's impact on climate change in support of the Sustainable Development Goals.

Innovation Metrics

Invention Count (last 12 months)

642 Inventions

Green Invention Count (last 12 months)

64 Green Inventions

Each invention reflects a substantial investment of R&D and legal resources. Consequently, green inventions provide a reliable and high-integrity metric for measuring a company's innovation efforts in green technologies and sustainability.

Rolling 1-Year Invention Count

The graph above illustrates the number of green inventions published by the company over the past decade. Data is presented monthly, with each point representing the total green invention count for the preceding 12 months.

Green Technology Footprint

The graph below showcases the temporal distribution of the company's green innovation activity across technology fields listed in the IPC Green Inventory. This distribution highlights the green technology footprint and its evolution as part of the company's innovation strategy.

Rolling 3-Year WIPO-Green Footprint

The table below provides a quantitative analysis of the growth and significance of the company's key green technology fields. For each field, the most frequently appearing keywords in recent inventions offer valuable insights into the company's green innovation activities.

WIPO-Green Technology Field	Absolute Growth (3y)	Percentage of Green Inventions (3y)	Keywords (3y)
Low energy lighting	38	17.8%	partition wall, optical element, transparent electronic, transparent display, semiconductor light
Bio-fuels	36	16.9%	ester compound, nucleic acid, cell addition, virus vector production, virus purification
Solar energy	35	16.4%	solar cell, reflective mask, reflection type mask, glass substrate, conductive paste
Storage of thermal energy	24	11.3%	heat cycle, heat transfer, storage container, solvent composition, hydrohaloolefin composition
Fuel cells	20	9.4%	solid polymer fuel, polymer fuel cell, solid electrolyte, membrane electrode assembly, fuel cell
Pollution control	20	9.4%	acidic gas, acid gas, temperature zirconium oxide, reducibility temperature zirconium, maximum reducibility temperature
