

Green Innovation Report

Continental Aktiengesellschaft - 2024

ISIN: DE0005439004, **Ticker:** CON, **Country:** DE, **Sector:** Automotive Parts & Equipment

This report evaluates the green innovation activities of the company over the past decade, based on inventions published in green technology areas defined by the [IPC Green Inventory](#). This inventory, established by the World Intellectual Property Organization, identifies technologies aligned with the United Nations' definition of Environmentally Sound Technologies. These innovations contribute to mitigating humanity's impact on climate change in support of the Sustainable Development Goals.

Innovation Metrics

Invention Count (last 12 months)

986 Inventions

Green Invention Count (last 12 months)

120 Green Inventions

Each invention reflects a substantial investment of R&D and legal resources. Consequently, green inventions provide a reliable and high-integrity metric for measuring a company's innovation efforts in green technologies and sustainability.

Rolling 1-Year Invention Count

The graph above illustrates the number of green inventions published by the company over the past decade. Data is presented monthly, with each point representing the total green invention count for the preceding 12 months.

Green Technology Footprint

The graph below showcases the temporal distribution of the company's green innovation activity across technology fields listed in the IPC Green Inventory. This distribution highlights the green technology footprint and its evolution as part of the company's innovation strategy.

The table below provides a quantitative analysis of the growth and significance of the company's key green technology fields. For each field, the most frequently appearing keywords in recent inventions offer valuable insights into the company's green innovation activities.

WIPO-Green Technology Field	Absolute Growth (3y)	Percentage of Green Inventions (3y)	Keywords (3y)
Commuting, e.g., HOV, teleworking, etc.	204	31.1%	motor vehicle, road segment, road network, electronic control, weather condition
Measurement of electricity consumption	102	15.5%	battery sensor, current sensor, motor vehicle, circuit arrangement, resistor assembly
Vehicles in general	87	13.2%	motor vehicle, transmission assembly, electric vehicle, onboard electrical, motor vehicle electrical
Storage of electrical energy	37	5.6%	voltage supply, capacitor assembly, voltage supply arrangement, vehicle drive power, rechargeable battery supplier
Pollution control	36	5.5%	catalytic converter, internal combustion engine, honeycomb body, exhaust gas sensor, electrical feedthrough
Power supply circuitry	36	5.5%	motor vehicle, energy storage, voltage zone, power supply, operating mode
