

Green Innovation Report

Infineon Technologies AG - 2024

ISIN: DE0006231004, **Ticker:** IFX, **Country:** DE, **Sector:** Semiconductors

This report evaluates the green innovation activities of the company over the past decade, based on inventions published in green technology areas defined by the [IPC Green Inventory](#). This inventory, established by the World Intellectual Property Organization, identifies technologies aligned with the United Nations' definition of Environmentally Sound Technologies. These innovations contribute to mitigating humanity's impact on climate change in support of the Sustainable Development Goals.

Innovation Metrics

Invention Count (last 12 months)

728 Inventions

Green Invention Count (last 12 months)

203 Green Inventions

Each invention reflects a substantial investment of R&D and legal resources. Consequently, green inventions provide a reliable and high-integrity metric for measuring a company's innovation efforts in green technologies and sustainability.

Rolling 1-Year Invention Count

The graph above illustrates the number of green inventions published by the company over the past decade. Data is presented monthly, with each point representing the total green invention count for the preceding 12 months.

Green Technology Footprint

The graph below showcases the temporal distribution of the company's green innovation activity across technology fields listed in the IPC Green Inventory. This distribution highlights the green technology footprint and its evolution as part of the company's innovation strategy.

The table below provides a quantitative analysis of the growth and significance of the company's key green technology fields. For each field, the most frequently appearing keywords in recent inventions offer valuable insights into the company's green innovation activities.

WIPO-Green Technology Field	Absolute Growth (3y)	Percentage of Green Inventions (3y)	Keywords (3y)
Measurement of electricity consumption	260	36.0%	magnetic field, magnetic field sensor, current sensor, digital converter, semiconductor package
Solar energy	240	33.2%	power semiconductor module, semiconductor package, semiconductor module arrangement, semiconductor module, power module
Power supply circuitry	64	8.9%	power supply, capacitive coupling, power semiconductor module, flexible structure, wireless power transfer
Vehicles in general	52	7.2%	battery management, vehicle battery, transmission line inspection, supply circuit, secondary controller
Low energy lighting	8	1.1%	substrate arrangement, optical projection, group iii, grid structure
