

# Green Innovation Report

## Dai Nippon Printing Co., Ltd. - 2024

**ISIN:** JP3493800001, **Ticker:** 7912, **Country:** JP, **Sector:** Commercial Printing

This report evaluates the green innovation activities of the company over the past decade, based on inventions published in green technology areas defined by the [IPC Green Inventory](#). This inventory, established by the World Intellectual Property Organization, identifies technologies aligned with the United Nations' definition of Environmentally Sound Technologies. These innovations contribute to mitigating humanity's impact on climate change in support of the Sustainable Development Goals.

## Innovation Metrics

### Invention Count (last 12 months)

676 Inventions

### Green Invention Count (last 12 months)

142 Green Inventions

Each invention reflects a substantial investment of R&D and legal resources. Consequently, green inventions provide a reliable and high-integrity metric for measuring a company's innovation efforts in green technologies and sustainability.

Rolling 1-Year Invention Count

The graph above illustrates the number of green inventions published by the company over the past decade. Data is presented monthly, with each point representing the total green invention count for the preceding 12 months.

## Green Technology Footprint

The graph below showcases the temporal distribution of the company's green innovation activity across technology fields listed in the IPC Green Inventory. This distribution highlights the green technology footprint and its evolution as part of the company's innovation strategy.

The table below provides a quantitative analysis of the growth and significance of the company's key green technology fields. For each field, the most frequently appearing keywords in recent inventions offer valuable insights into the company's green innovation activities.

WIPO-Green Technology Field	Absolute Growth (3y)	Percentage of Green Inventions (3y)	Keywords (3y)
Communing, e.g., HOV, teleworking, etc.	193	22.3%	information processing, computer program, information processor, virtual space delivery, education support
Low energy lighting	110	12.7%	image display, vapor deposition mask, vapor deposition, optical film, surface plate
Fuel cells	96	11.1%	power storage, metal terminal, exterior material, adhesive film, out package material
Storage of electrical energy	96	11.1%	metal terminal, power storage, adhesive film, terminal adhesive film, metal terminal adhesive
Solar energy	26	3.0%	solar cell module, semiconductor package, power collection sheet, solar cell, solar battery module
