

# Green Innovation Report

## Shimadzu Corporation - 2024

**ISIN:** JP3357200009, **Ticker:** 7701, **Country:** JP, **Sector:** Electronic Equipment & Instruments

This report evaluates the green innovation activities of the company over the past decade, based on inventions published in green technology areas defined by the [IPC Green Inventory](#). This inventory, established by the World Intellectual Property Organization, identifies technologies aligned with the United Nations' definition of Environmentally Sound Technologies. These innovations contribute to mitigating humanity's impact on climate change in support of the Sustainable Development Goals.

## Innovation Metrics

### Invention Count (last 12 months)

311 Inventions

### Green Invention Count (last 12 months)

17 Green Inventions

Each invention reflects a substantial investment of R&D and legal resources. Consequently, green inventions provide a reliable and high-integrity metric for measuring a company's innovation efforts in green technologies and sustainability.

The graph above illustrates the number of green inventions published by the company over the past decade. Data is presented monthly, with each point representing the total green invention count for the preceding 12 months.

## Green Technology Footprint

The graph below showcases the temporal distribution of the company's green innovation activity across technology fields listed in the IPC Green Inventory. This distribution highlights the green technology footprint and its evolution as part of the company's innovation strategy.

Rolling 3-Year WIPO-Green Footprint

The table below provides a quantitative analysis of the growth and significance of the company's key green technology fields. For each field, the most frequently appearing keywords in recent inventions offer valuable insights into the company's green innovation activities.

WIPO-Green Technology Field	Absolute Growth (3y)	Percentage of Green Inventions (3y)	Keywords (3y)
Commuting, e.g., HOV, teleworking, etc.	28	25.2%	analysis information management, document retrieval, workload index calculation, test schedule management, taste information
Measurement of electricity consumption	10	9.0%	wire rope inspection, magnetic detection, flight mass, biomagnetism measurement, waveform processing support
Pollution control	8	7.2%	liquid generator, ion filtration column, heat treatment furnace, gas monitoring, gas analysis
Nuclear engineering	7	6.3%	ray analysis, bone density, ray fluorescence analyzer, ray aperture member
Hydro energy	3	2.7%	gear pump
Solar energy	1	0.9%	power supply, diffraction grating
