

# Green Innovation Report

## Valmet Oyj - 2024

**ISIN:** FI4000074984, **Ticker:** VALMT, **Country:** FI, **Sector:** Industrial Machinery & Supplies & Components

This report evaluates the green innovation activities of the company over the past decade, based on inventions published in green technology areas defined by the [IPC Green Inventory](#). This inventory, established by the World Intellectual Property Organization, identifies technologies aligned with the United Nations' definition of Environmentally Sound Technologies. These innovations contribute to mitigating humanity's impact on climate change in support of the Sustainable Development Goals.

## Innovation Metrics

### Invention Count (last 12 months)

86 Inventions

### Green Invention Count (last 12 months)

16 Green Inventions

Each invention reflects a substantial investment of R&D and legal resources. Consequently, green inventions provide a reliable and high-integrity metric for measuring a company's innovation efforts in green technologies and sustainability.

Rolling 1-Year Invention Count

The graph above illustrates the number of green inventions published by the company over the past decade. Data is presented monthly, with each point representing the total green invention count for the preceding 12 months.

## Green Technology Footprint

The graph below showcases the temporal distribution of the company's green innovation activity across technology fields listed in the IPC Green Inventory. This distribution highlights the green technology footprint and its evolution as part of the company's innovation strategy.

Rolling 3-Year WIPO-Green Footprint

The table below provides a quantitative analysis of the growth and significance of the company's key green technology fields. For each field, the most frequently appearing keywords in recent inventions offer valuable insights into the company's green innovation activities.

| WIPO-Green Technology Field          | Absolute Growth (3y) | Percentage of Green Inventions (3y) | Keywords (3y)  |
|--------------------------------------|----------------------|-------------------------------------|--|
| Harnessing energy from manmade waste | 27                   | 26.2%                               | fluidized bed boiler, pulp mill, liquor injection pipe, chemical recovery boiler, cellulose pulp |
| Pollution control                    | 22                   | 21.4%                               | steam separator, green liquor, whitewater spray, wet electrostatic precipitator, water treatment |
| Bio-fuels                            | 15                   | 14.6%                               | biomass material, thermal processing, screw feeder, pyrolytic vapor, pre hydrolysis pressure     |
| Solar energy                         | 7                    | 6.8%                                | compact high performance, ambient air, adjustable deckle   |
| Treatment of waste                   | 6                    | 5.8%                                | drum type, type pulping machine, textile material, drum type pulping, drum pulper                |
| Using waste heat                     | 5                    | 4.9%                                | fibrous web, bed boiler, heat exchanger, fluidized bed boiler                                    |
| Pyrolysis or gasification of biomass | 2                    | 1.9%                                | product fraction   |
