This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Omschrijving
20799	OBE: when no languages or only the English language are configured, we will display the English language as the default language and hide the language dropdown, since there are no other language options available. 
20804	We observed an issue when an invoice or credit invoice had a status of <i>Credited</i> , <i>Void</i> , <i>Split</i> , or <i>Transfer</i> , the Email, Print, and Download actions did not work. This is now resolved.
20833 + 20867	We observed another issue when attempting to print, download, or email an invoice . An error message appeared because the invoiced contact was missing the address details, causing the system to fail during the print process. A validation check will now handle this to avoid further errors.
20472	Keycard Vostio had an issue with the read functionality not working. This is now resolved.
20685	When using the F3 Search function, pressing <i>Enter</i> on most fields triggers the search action. However, if the user adjusts the “Number of Days” field, pressing <i>Enter</i> no longer starts the search. Instead, the user had to manually click the Search button. This is fixed to ensure consistency and usability.
18435	We observed issue when using any of the edit actions on a stayover reservation. We observed that booking/booking details were missing giving errors when opening/accessing a proforma. Development work has been conducted thoroughly and resolves the issues we were facing.
