This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Omschrijving
10022	<p>In the communication template, when applying an invalid parameter on the subject field, the expected error was no longer appearing. This has been fixed:</p>  <p>The screenshot shows the 'Template Settings' dialog box with the 'Subject' field containing the invalid parameter '({_GroupName}}))'. An error message box is displayed in the center, stating: 'The following parameters are invalid : {{_GroupName}}))}}'. The proper format is {{ }}. You can save your changes, discard your changes, or cancel to continue editing. The error message box has 'Cancel', 'Discard', and 'Save' buttons.</p>
21474	<p>We added the following extra columns to the Firewall Logs screen: <b>Start date and time</b>, <b>End date and time</b> and <b>Session Request Count</b>.</p>  <p>The screenshot shows the 'FIREWALL LOGS' screen with a table of logs. The table has columns for 'Start', 'End', 'Policy mode', 'Rule name', 'Client IP', 'Message', and 'Request count'. The 'Request count' column is highlighted with a red box. The table contains several rows of log data.</p>
21390	<p>We observed an issue when a bookings plan product had <b>“Charge Next Day: Yes”</b> enabled and an early departure was done. The proforma was no longer opening. This has been fix and verified using the different edit functions.</p>
21410	<p>We experienced an issue with proforma’s generating an error as a result of attaching/detaching reservations. This is now resolved.</p>
