This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Omschrijving
13972	<p>Improvements have been made to the Excel download list of the housekeeping overview screen. Previously the out of order comments and housekeeping remarks were not properly displayed in the Excel download. This is now adjusted.</p> 
21213	<p>Previously, when performing the check-out of a roomstay via the main dashboard check-out icon, we were showing the below message although the invoice was already generated. It was not taking into account if it's a proforma or an invoice. This has been restored to ensure we only display this message when there still is an open proforma.</p> 
21525	<p>OBE: we experienced a display issue when the <b>Rates View</b> was selected. In that case, an incorrect total amount was displayed per room type. This is now restored.</p> 

21537

PayByLink deposit request: it was no longer possible to apply amounts with decimals when requesting a deposit from the PMS. This is now restored.

An issue was reported where, when sending a communication template from the summary screen, only the primary email address was displayed, even if a secondary email address was updated to the profile. This has now been resolved, and the secondary email address is displayed correctly when it exists in the profile.

Statistic report: Occupancy report enhancements:

- The occupancy report now responds much faster when generating it.
- Revenue comparison on rates now takes the total amount excluding VAT (was including VAT previously).
