This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Omschrijving
21563	CCV: we were getting a 404-page not found error message while saving the CCV payment page configuration on the integration page. This is now resolved.
21726	<p>Main Dashboard: we observed that after check-in of an M&E reservation, the setup name was suddenly missing in the Setup Name column. This is now fixed.</p> 
21733	<p>During a room move of a checked-in reservation, we observed that the previous reservation was updated to the status cancelled instead of the expected status checked-out. This has been restored to ensure the old reservation is updated to checked-out.</p> 
20905	<p>M&E: we experienced an issue when trying to change the number of pax in a program, via the Pax Change function, the update was not reflecting correctly in the folio and program overview screen. This is now restored.</p>
