# Fixes Document

17-02-2026

This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
21588	We made the following improvements to the **Payment Journal** report: • Added a **Payment Date** column. The value corresponds to the Payment Summary report. • Renamed the **Date & Time** column to **Creation Date** while maintaining the existing logic. **Before:** **After:**
22380	We identified an issue in the **Rate Overview** update function **Increase/Decrease Base Rate** where incorrect values were being applied. This issue has now been resolved.
22582	We implemented the following enhancement for profiles received from external parties: Previously, a dot (.) was stored—for example, in the **City** field. It is now treated as an empty field.
22737	We observed an issue where, for a checked-in reservation with a past arrival date, if the **Logies** price was manually edited after generating the **Invoice** and **Credit Invoice**, the **Tourist Tax** product was missing. This is now fixed.
