

## Fixes Document

23-02-2026

This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
22816	We identified an issue affecting early departures for same-day arrivals, where the converted day-use screen was not updating correctly. This has now been resolved.
22915	<p>We identified an issue on the Room Rack screen where the room status dropdown displayed duplicate status options. This has now been resolved.</p> 
22926	<p>We identified an issue where, after changing the end date of a rate, the system prompted a message to update the rate in the assigned rooms, but the update was no longer being applied automatically. This functionality has now been restored.</p>  
22918	We identified an issue where certain block parameters were appearing blank in communication templates. This has now been resolved.
20433	We identified an issue with OBE rates where rates displayed online did not match those in the PMS. This discrepancy was caused by rates using the subtract rule on bookingsplans and has now been resolved.
20577	We identified an issue in Report Permissions where updating the "Available for Roles" for users initially appeared to save, but the changes were reverted after refreshing the page. This has now been fixed.
