

Fixes Document

14-04-2026

This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
23593	CRM: fixed an issue in the CRM company profile where the receivable number could not be edited, even when users had the required roles assigned. The logic has been corrected to ensure the receivable number is editable only when the user has the appropriate role permissions.
23461	Collective Invoices: fixed an issue where some hotels encountered an error message when creating collective invoices. The root cause has been identified and resolved.
23466	<p>Reports: fixed an issue where the Reservations Created report could run indefinitely without generating results. The root cause has been identified and resolved, ensuring the report now completes and generates as expected.</p>
