

## Fixes Document

04-05-2026

This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
19825 & 23558	We identified an issue in which performing a room move on a checked-in stayover reservation did not correctly update availability for all affected room types in the channel manager. This has now been restored.
23888	We observed an issue with the registration form printout, where amounts were displayed with a Euro (€) symbol instead of the respective currency symbol of the property. This is now resolved.
