This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
24463	<p>After last week's patch, a change was observed in the menu tree behavior. When users switch to full-screen mode and then search for a reservation, the navigation menu tree automatically reappears, causing the screen to exit full-screen mode. This issue has now been resolved.</p>  <p>The screenshot shows the VIPS CloudPMS interface. At the top left, the logo 'VIPS CLOUD PMS' is visible. A search bar contains the text 'Search Reservation by number or ... 2231'. To the right of the search bar are buttons for '+ New Reservation', '+ New Message', and 'Action'. Below the search bar is a table with columns: Reservation Number, Room Number, OTA ReservationId, Guest, Booker, Agent, Company, Group Name, Arrival, Departure, FAX, Phone, Email, and Status. The table contains one row of data. On the left side, there is a navigation menu with items: Dashboard, Reservations, Financial, Housekeeping, CRM, Reports, Yield management, Settings, Integrations, Multi Property, and Security. A red box highlights the hamburger menu icon in the top left of the navigation menu, and a red arrow points to it from the text above.</p>
