

Fixes Document

07-07-2026

This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
22571	Previously, the Legionella task was not being correctly displayed in the Alerts Dashboard. This issue has been resolved, ensuring that the task is now generated and alerted according to the configured schedule whenever a room has remained unoccupied for the specified number of consecutive days.
23510	<p>The following issues have been resolved:</p> <ol style="list-style-type: none"> 1. Clicking Packages from the Settings Expiry dropdown no longer results in a 404 – Page Not Found error. 2. The Settings Expiry icon is now displayed correctly in the toolbar. It now updates without requiring a page refresh. 3. Users without the required menu item permissions can no longer access Settings Expiry. 
24426	An issue was identified with the Communication Block parameters where the configured table themes were no longer applied correctly. It was also reported that the email preview shown prior to sending did not accurately reflect how the email was ultimately rendered in the guest's inbox. This is now resolved.
24521	<p>An issue was identified where, for a reservation that included a Roomstay, Function Room and a Program, performing a Group Cancel from the Summary screen successfully cancelled the Roomstay and Function Room reservations, but the associated Program remained active and was not cancelled. This issue has now been resolved.</p>
