This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
18621	We resolved an issue where Vehicle Details were still displayed in both the Online Registration form and the printed form when the vehicle details option was disabled. Vehicle details are now correctly hidden when this option is disabled. 
24570	We improved the Block Parameters Placeholder dropdown to display the full parameter descriptions in all languages. This prevents text from being truncated, making it easier to distinguish between similar parameters, particularly for tax-related placeholders. 
24871	We resolved an issue where adding products to Program Items for an M&E reservation could result in an error message.
