This document contains a list of all improvements implemented today. We, the VIPS CloudPMS team, are constantly working to improve and update the application. We can't do this without your help. Thank you!

The following items have been fixed:

Case	Description
26152	An issue affecting **Winston POS** products has been resolved. Previously, changing the **Consolidation Date** multiple times on the **proforma** caused the product amount to be added to the existing amount, resulting in an incorrect total. Each subsequent consolidation date change caused the amount to increase further. This issue did not occur when the consolidation date was added or modified directly in the folio, only on the proforma.
26560	Two observations have been resolved: 1. When performing an early check-out, the pop-up message indication that the proforma is still open was not appearing.  2. Tasks on the Alerts Dashboard for Dayuse reservation, were displaying incorrect buttons. 
26689 & 26734	Following technical improvements to the **check-in process** in Sprint 76, an issue affecting the ability of some hotels to check in reservations was identified. This issue has been resolved, and check-in functionality is working as expected.
26718	An issue that prevented the **optional deadline alert** from appearing in the Alerts dashboard when selecting an optional date during new reservation creation has been resolved.
