**Transition Warranty:  
Improve your farm's profit and  
resiliency without risking yields**

 **opterra**

# AgriSafe

## Insure your feed & silage yields while transitioning your dairy farm

AgriSafe provides a safety net when experimenting with climate-smart agricultural approaches, ensuring you can make your farm more profitable and resilient in the long run without worrying about risking profit now.

We understand that trying new approaches on your farm comes with risk, but AgriSafe is confident that new sustainability approaches are better for farmers and we're willing to put our money where our mouths are. When you implement a plan backed by AgriSafe we insure your yields won't decline due to that practice.

### Why AgriSafe?

- 🛡 **Transition safety net:** protects yields when trying new practices
- ↗ **Pathway to higher profit:** cut input costs & boost efficiency
- 📊 **Easy monitoring:** 2 on-farm audits + satellite data
- 🔗 **Seamless integration** with carbon & nitrogen programs

### How it Works

- Annual premium** €10 per ha
- Covers yield dips** between 95–75% of historical average\*
- Annual renewal**, with wide flexibility on approved practices
- Your transition plan & choice** – backed by agronomist partners

### Practices Covered

- Fertilizer optimization** for forage crops
- Cover cropping** to improve soil & silage yields
- Low/no till** to cut diesel & improve forage resilience
- Other sustainability measures** (additional outdoor days, grazing optimization)
