

MK1 SERIES : Installation guide

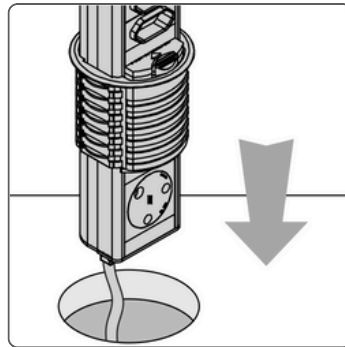

Step 1

Make a cut-out in a predetermined location with a diameter of 80mm. Ensure there is sufficient clearance: 450mm below the work surface and at least 50mm between the cut-out edge and the edge of the work surface. Ensure the cable can easily reach the power point.

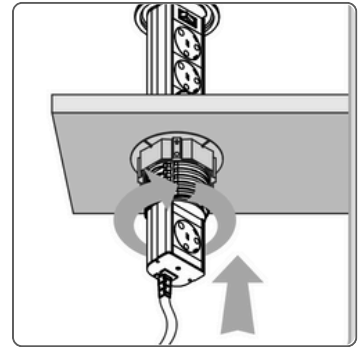

Step 2

Remove the locking collar by turning it in a clockwise direction (when viewed from above). Do not connect the unit to power until the installation is complete.

Step 3

Drop the unit, cable first, into the pre-cut mounting hole and angle the unit in the preferred orientation.

Step 4

Once the unit is positioned in the opening, proceed to attach the locking ring by twisting it on in a clockwise direction (when viewed from below) until tightly fastened. Be sure to keep the unit in the desired orientation while fastening.

Dimensions

Mounting Hole: Ø80mm (Approx. 3-3/20 in.)

MK1 dimensions : 392mm x 103mm

MK1.1 dimensions : 345mm x 103mm

MK1.1 AC dimensions : 392mm x 103mm

Surface Thickness

10mm – 50mm (Approx. 2/5 in. – 2 in.)

Maintainence and Care

- Ensure unit is disconnected prior to cleaning.
- Clean the unit with a damp cloth and dry immediately.
- Do not use harsh chemical solvents.

Applicable Products

- MK1
- MK1.1
- MK1.1 AC
