CUSTOMISABLE POWER

Tailor to your power
and data needs

2X

Connection Types: 3PP
and 3PP bypass

Description

The Beta Workstation Power Outlet is the perfect solution for any workspace. Made from durable plastic, this outlet offers high-quality performance at an affordable price. Its innovative mounting clip ensures quick and hassle-free installation. With direct connection capabilities via 3PP connectors and customisable end caps on either side, the Beta Power Outlet integrates seamlessly to meet your power needs. Reliable and cost-effective, it enhances your workspace while providing the essential power you require.

Power Configuration

The Beta power outlet provides full customisation to meet your specific power requirements. Customers can configure the number of power outlets, switches, and protection devices, while also incorporating voice and data connections. With flexible options like 3PP, 3PP bypass, data, or blank end caps, units can easily link via 3PP connectors. Furthermore, customers have the option to select from 24 international power outlets, ensuring compatibility for various regions.
