Description

The Slimline Range redefines workspace power solutions with its ultra-slim, 40mm-wide outlets and four stylish profiles—Protea, Orion, Omega, and Iris—engineered from high-quality aluminium and engineering plastic materials. This modular collection allows you to customise power, data and communication outlets in a variety of colours, enabling you to create a setup that perfectly suits your environment. It offers easy installation options and features a clever swivelling cable strain relief system that keeps your cables neat and secure. With its minimalist design and sturdy construction, this range ensures you have an efficient and stylish workspace.

Power Configuration

The Slimline Range offers a flexible power configuration system designed to adapt to your unique needs. With a variety of outlet options, you can choose from an extensive selection of power, data, and communication outlets, creating a setup that perfectly fits your workspace. The design supports dual circuits for clean/dedicated and normal power sources, all integrated into a sleek, single unit. Plus, you can easily connect multiple units, making your workspace more efficient.

Technical Specifications

Voltage	110V – 250V AC @ 50Hz – 60Hz
Current	15A
Power	1800W @ 110V – 125V AC 3000W @ 220V – 250V AC

Applications

- Office desks
- Call centres
- Coffee shop
- Laboratories
- Meeting areas
- Workshops
- Waiting areas
- Co-working areas

Dimensions

- Height: 42mm (Approx. 1.65 in.)
- Orion: 52mm (Approx. 2.05 in.) (W)
- Protea: 67mm (Approx. 2.64 in.) (W)
- Iris: 54mm (Approx. 2.13 in.) (W)
- Omega: 64mm (Approx. 2.52 in.) (W)
- Length: Variable (Depends on configuration)

Approximate Weight

- Depends on configuration
