### PERIPHERALS OPTIONS

# Description

The V-Dock is a fully concealed, under-desk mounted boardroom power unit engineered for discreet and flexible power integration. Mounted to the underside of the work surface beneath a pre-cut aperture, the V-Dock allows the user to utilise their own hinged flap or roller cover design, seamlessly blending into the surrounding environment.

Designed for maximum configurability, the V-Dock can house a wide range of power and communication modules to suit almost any project requirement. The unit offers complete flexibility while remaining hidden from view, making it ideal for premium boardrooms, offices and shared workspaces.

Please note: Powerlogic does not supply fastening screws, hinged flaps or roller covers.

## Power Configuration

V-Dock offers configurable power, engineered for maximum configurability. Configuration options include standard AC power outlets, USB charging modules and a wide range of integrated data and communication interfaces such as HDMI, VGA, RCA, USB Data, Audio and Mic modules. Optional switches, including a 15A Thermal Overload Switch as well as standard red or green switches, can be incorporated depending on project requirements. The unit can be configured with either a solid base, rubber flap base or bristle base to allow cables to enter or exit from below.

## Technical Specifications

Voltage	110V – 250V AC @ 50Hz – 60Hz
Current	15A (20A with upgraded wiring)
Power	1800W @ 110V – 125V AC 3000W @ 220V – 250V AC

## Applications

- Executive boardrooms
- Meeting areas
- Conference facilities
- Training rooms
- Corporate offices
- Co-working areas

## Approximate Weight

- Depends on configuration

## Features

- Completely hidden below the work surface
- Designed for custom hinged flap or roller cover integration
- Dual-faced boardroom power configuration
- Configurable power and communication
- Cable exit options at horizontal or 45° angles
- Available with rubber flap, bristle or solid base
- Choose from Australian, Brazilian, SA, Schuko, Swiss, USA or UK power outlets
  - Strong aluminium housing
  - Wide range of colours and finishes available

## Mounting Options

The V-Dock is designed for recessed installation beneath a pre-cut aperture. The unit is aligned below the opening and secured in position using suitable M4 screws (screws not included). For units exceeding 250mm in length, additional mounting holes are provided along the aluminium housing for structural support.

## Dimensions

- Height: 100.5mm
- Width: 126.5mm (Cut-out size 127.5mm)
- Length: Variable (Depending on configuration)

## Colour Options

**All our products carry a 12-month warranty. Extended warranties are available by request**
