POWERDOCKS

ELEGANT POWER

Experience the next generation of PowerLogic pop-up powerdocks.

Table of Contents

The GEMINI 01

The GEMINI features a unique gas strut, dual-sided sockets, and an optional integrated wireless charger.

The Mk 1 Series 03

The Mk1 Series is a versatile pop-up powerdock with optional USB ports, a hidden socket, and a manually operated design for simple, reliable use.

The Mk 2 Series 05

The Mk2 Series is a sleek, premium pop-up powerdock engineered with a gas strut for automatic raising and lowering, with optional wireless charging and USB charging ports.

The Mk 3 Series 07

The Mk3 Series is a premium pop-up power solution with a fold-flat handle, dual USB ports, shuttered outlets, and a smooth manual lift-and-lock mechanism for easy access.

The PD 4 Series 09

The PD4 Series offers a range of stylish colours, integrated USB ports, an elegant round top cap, and a manually operated pop-up powerdock.

The PD 5 Series 11

The PD5 Series, our premium collection, includes USB ports, a distinctive octagonal top cap, a manually operated pop-up powerdock, and a choice of stylish colours.

Gemini

Elegant dual-sided power, elevated by smooth gas-strut operation and seamless surface integration.

The Gemini Series

Gemini is a premium pop-up power solution designed to provide convenient access to power and charging while keeping work surfaces neat and uncluttered. Its smooth gas-strut mechanism raises the unit from its flush-mounted position, revealing connections on both sides. Available in six configurations, Gemini can include standard power, 45 W or 85 W USB-C charging and an optional 15 W wireless charger integrated into the lid.

Features

Double-Sided Power
Sockets are positioned on both sides of the unit.

15 W Wireless Charging
WC models include a 15 W wireless charger integrated into the lid.

Smooth Gas-Strut
Raises the unit smoothly for effortless access.

Flush-Mounted Design
Sits almost flush with the surface when closed.

Premium Aluminium
A durable and modern finish.

Integrated Safety Protection
Shuttered outlets and resettable thermal overload protection.

Available Configurations

MK1 Series

Manual pull-up powerdock,
with convenient access on both sides of the surface.

The MK1 Series

The MK1 Series is a refined pull-up PowerDock designed for contemporary workspaces. Raised and lowered manually using discreet fold-flat chrome handles, the unit provides convenient access to power above the desk, while every configuration includes a dedicated SA 3-pin socket below the desk. When no longer required, it retracts neatly below the surface. Premium aluminium construction, shuttered power outlets, resettable thermal overload protection and water resistance when closed make the MK1 a durable solution for everyday workspace use.

Features

Manual Pull-Up PowerDock

Raise and lower the unit manually using the fold-flat chrome handles.

Power Above and Below

Provides power access above the work surface, with an additional SA 3-pin socket below the desk.

USB-A and USB-C Charging

Available on the MK1.1 AC for convenient charging above the desk.

Concealed Pull-Up Design

Retracts neatly below the work surface when not in use.

Premium Aluminium

Made from premium aluminium for a durable, refined and modern finish.

Integrated Safety Protection

Shuttered power outlets, resettable thermal overload protection and an integrated seal for water resistance when closed.

Available Configurations

MK1

2 × SA 3-pin sockets
3 × new SA 3-pin sockets
1 × SA 3-pin socket below the desk

MK1.1

1 × SA 3-pin socket
1 × round SA 2-pin socket
1 × new SA 3-pin socket
1 × SA 3-pin socket below the desk

MK1.1 AC

1 × SA 3-pin socket
1 × round SA 2-pin socket
1 × new SA 3-pin socket
1 × USB-A port
1 × USB-C port
1 × SA 3-pin socket below the desk

All MK1 configurations include a reset switch above the desk.

MK2 Series

Refined pop-up power with smooth gas-strut operation for effortless raising and retraction.

The MK2 Series

The MK2 Series is a refined pop-up PowerDock designed to provide convenient access to power and charging while keeping work surfaces neat and uncluttered. Its gas-strut mechanism raises the unit smoothly from its flush-mounted position and allows it to retract neatly into the surface when no longer required. Available in six configurations, the MK2 Series offers a range of power and charging options to suit different workspace requirements. Premium aluminium construction provides a durable, modern finish, while the illuminated blue ring clearly indicates when the unit is powered on. The MK2 is also splash-resistant when closed.

Features

Smooth Gas-Strut Lift

Raises the unit smoothly from its flush-mounted position.

Flush-Mounted Design

Retracts neatly into the work surface when not in use.

USB-A and USB-C Charging

Available with USB-A and USB-C or dual USB-C charging on selected configurations.

Premium Aluminium

Made from premium aluminium for a durable, refined and modern finish.

Splash Resistance

Splash-Resistant When Closed

Integrated Safety Protection

Shuttered power outlets, resettable thermal overload protection.

MK3 Series

Elegant manual pop-up power, raised
by a chrome handle and smoothly locked into position.

The MK3 Series

The MK3 Series is a manual pull-up PowerDock designed for contemporary workspaces. Using a discreet fold-flat chrome handle, the unit can be raised and lowered smoothly by hand, providing convenient access to power above the work surface. A dedicated SA 3-pin socket below the surface keeps fixed equipment connected, while the swivelling cable exit allows attached cables to remain connected when the unit is closed. Premium aluminium construction, water resistance when fully closed and integrated safety protection make the MK3 a durable and dependable solution for everyday use.

Features

Manual Pull-Up PowerDock

Raised and lowered by hand using the fold-flat chrome handle.

Power Above & Below the Surface

Provides convenient power above the work surface and a dedicated SA 3-pin socket below.

Swivelling Cable Exit

Allows attached cables to remain connected while the unit is closed.

USB-A and USB-C Charging

Integrated USB-A and USB-C ports are available on the MK3.1 AC.

Water Resistance When Closed

An integrated sealing system provides water resistance when the unit is fully closed.

Premium Aluminium

Made from premium aluminium for a durable, refined and modern finish.

Available Configurations

MK3.1

1 × SA 3-pin socket
1 × round SA 2-pin socket
1 × new SA 3-pin socket
1 × SA 3-pin socket below the surface

MK3.1 AC

1 × SA 3-pin socket
1 × round SA 2-pin socket
1 × new SA 3-pin socket
1 × USB-A & C charging port
1 × SA 3-pin socket below the surface

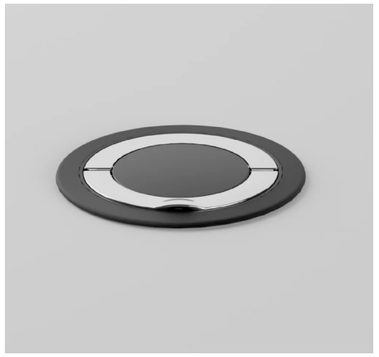

All MK3 configurations include a reset switch above the work surface.

PD4 Series

A manual PowerDock with above-and-below-surface sockets, USB charging options and four contemporary finishes.

The PD4 Series

The PD4 Series is a sleek manual pull-up PowerDock designed to provide convenient access to power and charging while keeping work surfaces neat and uncluttered. Its round top cap features a single chrome handle, allowing the unit to be raised and lowered smoothly by hand. Available in three configurations, each model includes a dedicated SA 3-pin socket below the work surface. Premium aluminium construction provides a durable, contemporary finish, while an integrated seal beneath the top cap offers water resistance when the unit is fully closed.

Features

Manual Pull-Up PowerDock

Raised and lowered by hand using the fold-flat chrome handle.

Power Above & Below the Surface

Provides convenient power above the work surface and a dedicated SA 3-pin socket below.
